WEBVTT

- $1\ 00:00:00.660 \longrightarrow 00:00:00.710$ Toot, toot oo tooooo
- $2\ 00:00:02.009 --> 00:00:03.520$ Some bacteria are beneficial.
- 3 00:00:03.720 \rightarrow 00:00:06.180 Some don't really matter. Some are really bad for you.
- $4\ 00:00:06.380 --> 00:00:08.990$ We'll talk about the latter. When it comes to antibiotics,
- $5~00:00:09.190 \dashrightarrow 00:00:12.659$ bacteria they can treat, but if we're fighting viruses then that's an impossible
- $6~00:00:12.859 \dashrightarrow 00:00:15.920$ feat. When given antibiotics you must finish every one.
- 7 00:00:16.320 --> 00:00:18.750 Keep on going day by day until the course is done.
- 8 00:00:19.380 --> 00:00:21.630 Even though you may feel you are your better self.
- 9 $00:00:21.990 \longrightarrow 00:00:24.149$ The remaining resistant bacteria may be hiding
- $10\ 00:00:24.349 \longrightarrow 00:00:25.979$ with stealth. In the US,
- 11 00:00:26.179 --> 00:00:27.660 drug resistance is quite shocking.
- $12\ 00:00:27.930 \longrightarrow 00:00:30.420$ Counting cases per year you'll see we aren't joking.
- 13 00:00:30.810 --> 00:00:32.400 Gonorrhea, campylobacter
- $14\ 00:00:32.600 --> 00:00:34.290$ and Candida to salmonella,
- $15\ 00:00:34.490 \longrightarrow 00:00:36.060$ MRSA, so much left to do.
- 16 00:00:36.630 --> 00:00:38.186 With Group B strep being a family affair,
- $17\ 00:00:38.386 --> 00:00:40.860$ any resistance to drugs is getting harder to bear.
- $18\ 00:00:41.340 --> 00:00:44.172$ The scariest one is found in your child's nose who strep pneumonia,
- $19\ 00:00:44.372 \longrightarrow 00:00:46.140$ we pray this figure never grows.
- 20 00:00:46.890 --> 00:00:48.690 There are many ways we can work to prevent,
- $21\ 00:00:48.890 \longrightarrow 00:00:50.610$ even small steps can help make a dent.
- $22\ 00:00:51.150 \longrightarrow 00:00:53.310$ Watchful waiting is what health workers advise.
- $23\ 00:00:53.580$ --> 00:00:55.860 That although you feel sick it won't be your demise.

- $24~00:00:56.340 \longrightarrow 00:00:58.290$ Allow time to pass before seeking drugs.
- $25\ 00{:}00{:}58.490 \dashrightarrow 00{:}01{:}00.540$ Be mindful of what could be cured with just hugs.
- 26 00:01:00.990 --> 00:01:03.060 Though if you do start to get sicker and sicker,
- $27\ 00:01:03.420 \longrightarrow 00:01:05.670$ go seek advice, the doctor won't snicker.
- $28\ 00:01:06.270 \longrightarrow 00:01:08.550$ Vaccines are vital and reduce risk of infection.
- $29\ 00{:}01{:}08.790 \dashrightarrow 00{:}01{:}11.280$ The pneumococcal vaccination can help this reduction.
- $30\ 00:01:11.650 --> 00:01:13.720$ There's even something you can do every day.
- $31~00{:}01{:}14.010 \dashrightarrow 00{:}01{:}16.290$ You must wash your hands each time that you play.
- $32\ 00{:}01{:}16.890 \dashrightarrow 00{:}01{:}18.990$ So moving on from this we all must agree,
- $33\ 00:01:19.230 \longrightarrow 00:01:21.120$ that this is a matter important to see.
- 34 00:01:21.630 --> 00:01:23.730 We all must do our part to reduce it to none,
- $35\ 00:01:23.930 --> 00:01:26.160$ before it's too late and can't be undone.
