

WEBVTT

1 00:00:01.300 --> 00:00:02.420 - So, hi everyone,
2 00:00:02.420 --> 00:00:03.460 welcome to join us
3 00:00:03.460 --> 00:00:05.080 and thank you for your patience
4 00:00:05.080 --> 00:00:08.530 and welcome to the Yeltsin town country
5 00:00:08.530 --> 00:00:09.850 to the house seminar,
6 00:00:09.850 --> 00:00:12.850 I'm today's moderator, Kai Chen,
7 00:00:12.850 --> 00:00:14.100 Assistant Professor
8 00:00:14.100 --> 00:00:16.420 at the Yale School of Public Health.
9 00:00:16.420 --> 00:00:19.180 If you have any questions during the presenta-
tion,
10 00:00:19.180 --> 00:00:21.550 please use the chat box
11 00:00:21.550 --> 00:00:24.380 and the speaker will answer them
12 00:00:24.380 --> 00:00:26.490 at the end of the seminar.
13 00:00:26.490 --> 00:00:28.370 So today, we're very pleased
14 00:00:28.370 --> 00:00:32.260 to have Dr. Michael Mendez join us
15 00:00:32.260 --> 00:00:34.750 who will talk about the vulnerabilities
16 00:00:34.750 --> 00:00:36.520 of Latino communities
17 00:00:36.520 --> 00:00:40.430 during the Thomas Fire in California.
18 00:00:40.430 --> 00:00:44.260 So Dr. Mendez is an Assistant Professor
19 00:00:44.260 --> 00:00:47.210 at the School of Social Ecology
20 00:00:47.210 --> 00:00:50.740 of the University of California, Irvine.
21 00:00:50.740 --> 00:00:53.840 So he has more than a decade experience
22 00:00:54.860 --> 00:00:57.360 in the public and private sectors
23 00:00:57.360 --> 00:00:59.710 and he was recently appointed
24 00:00:59.710 --> 00:01:02.300 by the National Academy of Science,
25 00:01:02.300 --> 00:01:04.350 Engineering and Medicine
26 00:01:04.350 --> 00:01:06.940 to the board on on Environmental Change
27 00:01:06.940 --> 00:01:07.893 and Society.
28 00:01:08.980 --> 00:01:11.010 He recently has a new book published
29 00:01:11.010 --> 00:01:14.280 by the Yale press

30 00:01:14.280 --> 00:01:16.900 named "Climate Change from the Streets",
31 00:01:16.900 --> 00:01:20.610 which provides an urgent and timely analysis
32 00:01:20.610 --> 00:01:24.430 of the continuous policies
33 00:01:24.430 --> 00:01:26.880 of incorporating environmental justice
34 00:01:26.880 --> 00:01:29.200 into global climate change process.
35 00:01:29.200 --> 00:01:30.510 So without further ado,
36 00:01:30.510 --> 00:01:33.810 I'm handing over to Dr. Michael Mendez
37 00:01:33.810 --> 00:01:36.920 and looking forward to his talk.
38 00:01:36.920 --> 00:01:37.840 - Great, good morning.
39 00:01:37.840 --> 00:01:40.440 Thank you, such a pleasure to be back at Yale
40 00:01:40.440 --> 00:01:41.970 at least through Zoom.
41 00:01:41.970 --> 00:01:44.210 So thank you to Robert
42 00:01:44.210 --> 00:01:47.390 and everyone with the Climate and Health
Center
43 00:01:47.390 --> 00:01:49.530 at the Yale School Public Health
44 00:01:49.530 --> 00:01:51.640 and sorry, I'm a little bit late,
45 00:01:51.640 --> 00:01:54.396 I got mixed up with the time so but I'm happy.
46 00:01:54.396 --> 00:01:57.350 It's online when I got the email.
47 00:01:57.350 --> 00:01:58.590 So today I'm gonna be talking
48 00:01:58.590 --> 00:02:00.760 about some research I actually started
49 00:02:00.760 --> 00:02:02.380 at the Yale School of the Environment,
50 00:02:02.380 --> 00:02:04.250 I'm looking at the "Disparate Impacts
51 00:02:04.250 --> 00:02:06.950 of Wildfires on Undocumented Immigrants"
52 00:02:06.950 --> 00:02:08.670 and specifically looking at "Lessons
53 00:02:08.670 --> 00:02:10.180 on Inclusive Disaster
54 00:02:10.180 --> 00:02:12.087 and Climate Adaptation Planning",
55 00:02:13.770 --> 00:02:16.440 so as many of you know, in California,
56 00:02:16.440 --> 00:02:18.960 over the last four or five months,
57 00:02:18.960 --> 00:02:20.030 we have been experiencing
58 00:02:20.030 --> 00:02:22.570 major climate change crises
59 00:02:22.570 --> 00:02:24.880 and in the last two months alone,

60 00:02:24.880 --> 00:02:27.950 millions of people have been impacted by fires,
 61 00:02:27.950 --> 00:02:32.320 blackouts, heat waves, worsening air quality
 62 00:02:32.320 --> 00:02:35.250 and of course, the ever present COVID-19
 pandemic
 63 00:02:35.250 --> 00:02:37.770 and of course, loss of life and property.
 64 00:02:37.770 --> 00:02:39.820 These are all major life events
 65 00:02:39.820 --> 00:02:43.860 and the five of the 10 largest wildfires
 66 00:02:43.860 --> 00:02:46.990 by acreage ever recorded in California
 67 00:02:46.990 --> 00:02:49.870 occurred within the last three months.
 68 00:02:49.870 --> 00:02:51.500 These compounds of disaster
 69 00:02:51.500 --> 00:02:53.810 have a corresponding health,
 70 00:02:53.810 --> 00:02:56.290 social and economic impacts to people,
 71 00:02:56.290 --> 00:02:58.120 especially people of color
 72 00:02:59.950 --> 00:03:03.170 and these individuals have suffered multiple
 weeks
 73 00:03:03.170 --> 00:03:05.370 of unhealthy air,
 74 00:03:05.370 --> 00:03:07.670 and that has been worsening throughout Cali-
 fornia.
 75 00:03:07.670 --> 00:03:09.230 So today, I'm gonna be speaking
 76 00:03:09.230 --> 00:03:11.240 about some of the research that I did,
 77 00:03:11.240 --> 00:03:14.110 I co-authored it with community based organi-
 zations
 78 00:03:14.110 --> 00:03:15.530 on immigrant rights group,
 79 00:03:15.530 --> 00:03:17.130 a migrant rights group
 80 00:03:17.130 --> 00:03:18.890 as well as an environmental justice group
 81 00:03:18.890 --> 00:03:20.340 that were on the front lines
 82 00:03:20.340 --> 00:03:24.660 during the 2018 Thomas wildfire,
 83 00:03:24.660 --> 00:03:26.400 so our presentation is gonna talk
 84 00:03:26.400 --> 00:03:28.500 about how these individuals
 85 00:03:28.500 --> 00:03:30.810 on these community groups stepped up
 86 00:03:30.810 --> 00:03:33.390 when there was no official government response
 87 00:03:33.390 --> 00:03:35.470 for undocumented immigrant communities.

88 00:03:35.470 --> 00:03:39.110 So these individuals were rendered invisible,
89 00:03:39.110 --> 00:03:40.750 not because they live in the shadows,
90 00:03:40.750 --> 00:03:42.850 not because people didn't know they were there
91 00:03:42.850 --> 00:03:44.440 but they're rendered invisible
92 00:03:44.440 --> 00:03:46.160 because of systemic racism
93 00:03:46.160 --> 00:03:48.580 and cultural norms of who's considered
94 00:03:48.580 --> 00:03:50.560 a worthy disaster victim
95 00:03:50.560 --> 00:03:53.528 and oftentimes, undocumented immigrants
96 00:03:53.528 --> 00:03:55.490 are not considered worthy disaster victims,
97 00:03:55.490 --> 00:03:57.300 therefore, they're rendered invisible
98 00:03:57.300 --> 00:03:59.310 and important resources,
99 00:03:59.310 --> 00:04:01.940 government resources, disaster relief,
100 00:04:01.940 --> 00:04:04.180 therefore is withheld from them,
101 00:04:04.180 --> 00:04:05.920 which makes them more vulnerable
102 00:04:05.920 --> 00:04:09.960 to disasters such as wildfires.
103 00:04:09.960 --> 00:04:11.360 So it's important to understand
104 00:04:11.360 --> 00:04:14.270 that Disaster Risk Reduction starts first
105 00:04:14.270 --> 00:04:17.550 and foremost with social integration of mi-
grants.
106 00:04:17.550 --> 00:04:18.840 I just mentioned that
107 00:04:18.840 --> 00:04:21.530 how these migrants were undocumented im-
migrants
108 00:04:21.530 --> 00:04:22.792 were rendered invisible
109 00:04:22.792 --> 00:04:23.740 because of systemic racism
110 00:04:23.740 --> 00:04:24.650 and cultural norms
111 00:04:24.650 --> 00:04:27.360 of who they were they disaster victim,
112 00:04:27.360 --> 00:04:30.010 so if you bring in undocumented immigrant,
113 00:04:30.010 --> 00:04:32.710 if you really wanna address Disaster Risk
Reduction
114 00:04:32.710 --> 00:04:34.170 before disaster you have
115 00:04:34.170 --> 00:04:36.330 to acknowledge the existing inequalities
116 00:04:36.330 --> 00:04:39.230 that undocumented immigrants experience

117 00:04:39.230 --> 00:04:41.710 their pre-disaster marginalized status
118 00:04:41.710 --> 00:04:42.850 and try to integrate
119 00:04:42.850 --> 00:04:45.000 and reduce those inequalities
120 00:04:45.000 --> 00:04:46.720 before disaster happens
121 00:04:46.720 --> 00:04:49.073 because when a disaster happens,
122 00:04:49.073 --> 00:04:52.700 that compounds in exasperates existing in-
equality
123 00:04:52.700 --> 00:04:54.390 so the point is to understand
124 00:04:54.390 --> 00:04:57.163 their pre-disaster marginalized status,
125 00:04:59.340 --> 00:05:00.270 as I mentioned before,
126 00:05:00.270 --> 00:05:02.361 this is some research that, first
127 00:05:02.361 --> 00:05:04.960 that was recently published by Geoforum,
128 00:05:04.960 --> 00:05:07.040 which is the leading human geography
129 00:05:07.040 --> 00:05:09.130 on journal in the field
130 00:05:09.130 --> 00:05:12.760 and we call it "the Invisible Victims of Disas-
ter"
131 00:05:12.760 --> 00:05:16.840 and I chose a community based on research
project
132 00:05:16.840 --> 00:05:19.140 and giving the migrant rights group
133 00:05:19.140 --> 00:05:21.210 and environmental justice groups authorship
134 00:05:21.210 --> 00:05:22.650 of this research
135 00:05:22.650 --> 00:05:24.840 and we worked jointly and collaboratively
136 00:05:24.840 --> 00:05:26.160 on the research questions,
137 00:05:26.160 --> 00:05:27.990 the data and of course, the analysis
138 00:05:27.990 --> 00:05:29.613 and throughout the publication.
139 00:05:33.720 --> 00:05:37.413 Oh, my God, this is the older version.
140 00:05:38.900 --> 00:05:42.760 So I just wanna show you some issues
141 00:05:42.760 --> 00:05:46.363 about disaster recovery resources here,
142 00:05:47.260 --> 00:05:50.600 this is an outline,
143 00:05:50.600 --> 00:05:52.930 that minus one of the assembly members
144 00:05:52.930 --> 00:05:55.450 where my parents live in Sylmar, California
145 00:05:55.450 --> 00:05:58.580 which is in the northeast part of Los Angeles

146 00:05:58.580 --> 00:06:00.010 and Sylmar, California
147 00:06:00.010 --> 00:06:02.690 is the working class immigrant community
148 00:06:02.690 --> 00:06:04.280 but it's important to note here
149 00:06:04.280 --> 00:06:08.750 when you go for disaster assistance of funds,
150 00:06:08.750 --> 00:06:10.590 you need to have a social security number
151 00:06:10.590 --> 00:06:12.000 and you need to have a bank account
152 00:06:12.000 --> 00:06:14.370 to receive federal disaster relief funds.
153 00:06:14.370 --> 00:06:18.130 Undocumented immigrants are not eligible to
that,
154 00:06:18.130 --> 00:06:21.540 my parents, luckily are now US citizens
155 00:06:21.540 --> 00:06:22.510 they are homeowners.
156 00:06:22.510 --> 00:06:25.450 So their vulnerability is very different
157 00:06:25.450 --> 00:06:29.060 on the other Latino migrant communities.
158 00:06:29.060 --> 00:06:33.940 So oftentimes in disaster relief funding and
practices,
159 00:06:33.940 --> 00:06:36.470 these ideas of Latinos
160 00:06:36.470 --> 00:06:39.430 being homogenous is integrated into policies
161 00:06:39.430 --> 00:06:42.680 and it does not effectively address
162 00:06:42.680 --> 00:06:44.510 all the issues that are happening
163 00:06:44.510 --> 00:06:45.800 to these communities.
164 00:06:45.800 --> 00:06:48.310 For example, these are some headlines
165 00:06:48.310 --> 00:06:49.960 that have happened over the year
166 00:06:49.960 --> 00:06:50.910 the Kincade Fire,
167 00:06:50.910 --> 00:06:52.420 which is in Northern California,
168 00:06:52.420 --> 00:06:54.160 Sonoma and Napa area,
169 00:06:54.160 --> 00:06:56.470 it talks about how farm workers had to flee
170 00:06:56.470 --> 00:06:58.810 from their houses, from the worker camps
171 00:06:58.810 --> 00:07:00.490 that they lived without gas
172 00:07:00.490 --> 00:07:03.182 and had to make shift shelters
173 00:07:03.182 --> 00:07:06.560 on nearby beaches and other parks
174 00:07:06.560 --> 00:07:08.270 because they were afraid to go to

175 00:07:08.270 --> 00:07:10.470 on the designated shelters that the county
176 00:07:10.470 --> 00:07:11.730 and local governments did
177 00:07:11.730 --> 00:07:14.770 for fear of deportation of ice,
178 00:07:14.770 --> 00:07:16.360 the Homeland Security coming in
179 00:07:16.360 --> 00:07:17.446 and taking them as well.
180 00:07:17.446 --> 00:07:21.860 There's also issues with language access.
181 00:07:21.860 --> 00:07:23.720 Oftentimes, when you talk
182 00:07:23.720 --> 00:07:25.950 about undocumented immigrants
183 00:07:25.950 --> 00:07:27.250 that are coming from Latin America,
184 00:07:27.250 --> 00:07:30.480 you think they're all Latino or Hispanic
185 00:07:30.480 --> 00:07:32.460 but a lot of them are indigenous,
186 00:07:32.460 --> 00:07:33.780 there were indigenous Mexicans
187 00:07:33.780 --> 00:07:36.290 or indigenous individuals from other countries
188 00:07:36.290 --> 00:07:38.670 and many of them are illiterate
189 00:07:38.670 --> 00:07:40.880 and many of them don't speak Spanish,
190 00:07:40.880 --> 00:07:42.120 let alone English.
191 00:07:42.120 --> 00:07:44.400 So to be able to communicate to them
192 00:07:44.400 --> 00:07:47.130 is quite important in their own languages,
193 00:07:47.130 --> 00:07:49.220 particularly in an oral fashion
194 00:07:49.220 --> 00:07:50.760 and then on the right hand side shows
195 00:07:50.760 --> 00:07:52.160 about domestic workers.
196 00:07:52.160 --> 00:07:55.030 Also domestic workers are also
197 00:07:55.030 --> 00:07:57.570 along with an undocumented farm workers
198 00:07:57.570 --> 00:08:02.180 are often asked to enter mandatory evacuation
zones,
199 00:08:02.180 --> 00:08:04.600 when the rest of the general public is asked
200 00:08:04.600 --> 00:08:06.300 to leave and flee for public health
201 00:08:06.300 --> 00:08:07.470 and safety issues.
202 00:08:07.470 --> 00:08:08.780 These individuals are asked to go
203 00:08:08.780 --> 00:08:09.960 into evacuation zones
204 00:08:09.960 --> 00:08:12.310 either if there's a domestic worker trying

205 00:08:12.310 --> 00:08:15.080 to get some of the goods and services,
206 00:08:15.080 --> 00:08:18.420 the goods that are in that house
207 00:08:18.420 --> 00:08:19.830 or undocumented workers
208 00:08:19.830 --> 00:08:21.250 that have to go into the fields
209 00:08:21.250 --> 00:08:24.510 to harvest the crops to protect them
210 00:08:24.510 --> 00:08:27.310 from smoking ash that are coming down.
211 00:08:27.310 --> 00:08:29.150 So it's a lot of inequalities
212 00:08:29.150 --> 00:08:30.480 about individual
213 00:08:30.480 --> 00:08:33.180 and oftentimes, these undocumented workers
214 00:08:33.180 --> 00:08:36.730 cannot file restitution or claims for,
215 00:08:36.730 --> 00:08:38.463 again, fear of deportation.
216 00:08:39.650 --> 00:08:41.990 So quick roadmap of what I'll be covering
today
217 00:08:41.990 --> 00:08:45.150 is understanding well fire and inequality,
218 00:08:45.150 --> 00:08:46.930 an overview of the Thomas wildfire
219 00:08:46.930 --> 00:08:49.750 and its impact on undocumented immigrants
220 00:08:49.750 --> 00:08:51.910 and then broader policy implications
221 00:08:51.910 --> 00:08:53.670 and recommendations based on the research
222 00:08:53.670 --> 00:08:56.033 that we did as a community based project
again.
223 00:08:57.320 --> 00:08:58.790 According to a recent Proceedings
224 00:08:58.790 --> 00:08:59.930 of the National Academies,
225 00:08:59.930 --> 00:09:02.730 climate change is making wildfire season longer
226 00:09:02.730 --> 00:09:04.010 and more severe.
227 00:09:04.010 --> 00:09:05.450 On average wildfires
228 00:09:05.450 --> 00:09:07.810 in the western United States burn six times
229 00:09:07.810 --> 00:09:10.510 the acreage they did 45 years ago,
230 00:09:10.510 --> 00:09:12.370 in California, Sierra Nevada,
231 00:09:12.370 --> 00:09:14.780 the frequency of wildfires since 1970,
232 00:09:14.780 --> 00:09:18.170 has increased by 256%,
233 00:09:18.170 --> 00:09:20.767 as the mountain snowpack melts earlier

234 00:09:20.767 --> 00:09:23.203 and the fire season extends year around,
 235 00:09:24.460 --> 00:09:29.010 here it shows that 50 of the 20 largest wildfire
 236 00:09:29.010 --> 00:09:32.930 by acreage in California has incurred since
 2000
 237 00:09:32.930 --> 00:09:35.000 and then you see here in this graphic
 238 00:09:35.000 --> 00:09:36.930 that was done earlier in the year
 239 00:09:36.930 --> 00:09:38.230 on the Thomas wildfire,
 240 00:09:38.230 --> 00:09:40.180 which happened in December 2017
 241 00:09:40.180 --> 00:09:43.990 and ended 40 days later in January 2018.
 242 00:09:43.990 --> 00:09:45.890 It was the second largest wildfire
 243 00:09:45.890 --> 00:09:49.170 until July of this year
 244 00:09:49.170 --> 00:09:52.760 but then all the wildfires happen in California
 245 00:09:52.760 --> 00:09:56.210 and it got knocked down to six in this graph
 246 00:09:56.210 --> 00:09:58.320 and there's a new updated table
 247 00:09:58.320 --> 00:10:01.070 that has a Thomas Fire number Seven
 248 00:10:01.070 --> 00:10:03.680 as the seventh largest wildfire by acreage,
 249 00:10:03.680 --> 00:10:08.680 so in just three months five other wildfires
 250 00:10:09.610 --> 00:10:13.500 overtook the Thomas wildfire as being the
 largest,
 251 00:10:13.500 --> 00:10:15.430 so the intensity and severity
 252 00:10:15.430 --> 00:10:18.320 of wildfires are happening more and more
 253 00:10:18.320 --> 00:10:19.850 here in California.
 254 00:10:19.850 --> 00:10:22.080 While climate scientists expect wildfires
 255 00:10:22.080 --> 00:10:23.890 to become more frequent and severe,
 256 00:10:23.890 --> 00:10:26.260 it is important to explore how some people
 257 00:10:26.260 --> 00:10:28.020 and communities are more affected
 258 00:10:28.020 --> 00:10:30.350 by these events and others.
 259 00:10:30.350 --> 00:10:32.060 Differences in human vulnerability
 260 00:10:32.060 --> 00:10:34.470 to wildfire stem from a range of social,
 261 00:10:34.470 --> 00:10:37.410 economic, historical and political factors.
 262 00:10:37.410 --> 00:10:39.560 These factors include unequal access

263 00:10:39.560 --> 00:10:41.340 to disaster preparedness, knowledge
264 00:10:41.340 --> 00:10:43.830 and resources, contrasts and legacies
265 00:10:43.830 --> 00:10:45.740 of forest management practices,
266 00:10:45.740 --> 00:10:48.110 an expansion of residential development
267 00:10:48.110 --> 00:10:49.253 into the wildland.
268 00:10:50.310 --> 00:10:52.430 Researchers at the University of Washington
269 00:10:52.430 --> 00:10:53.900 recently analyzed
270 00:10:53.900 --> 00:10:56.052 the unequal vulnerability of wildfires
271 00:10:56.052 --> 00:10:57.860 for communities of color,
272 00:10:57.860 --> 00:11:00.330 they use the social ecological approach
273 00:11:00.330 --> 00:11:02.410 to determine wildfire vulnerability
274 00:11:02.410 --> 00:11:06.910 across 70,000 census tracts in the United States.
275 00:11:06.910 --> 00:11:09.390 This map here shows wildfire potential,
276 00:11:09.390 --> 00:11:11.410 as determined by the US Forest Service
277 00:11:11.410 --> 00:11:12.610 by census tract
278 00:11:12.610 --> 00:11:15.830 and they're by and there's 29 million people
279 00:11:15.830 --> 00:11:18.410 that are vulnerable to a wildfire
280 00:11:18.410 --> 00:11:19.700 throughout the United States
281 00:11:19.700 --> 00:11:22.780 and this again, it's only based on landscape risk,
282 00:11:22.780 --> 00:11:25.420 that means how close you live next to a forest
283 00:11:25.420 --> 00:11:27.060 or some type of landscape
284 00:11:27.060 --> 00:11:28.320 that can catch on fire
285 00:11:28.320 --> 00:11:30.970 and does not look at social demographics
286 00:11:30.970 --> 00:11:32.820 or what we call social vulnerability.
287 00:11:34.290 --> 00:11:35.350 The second map,
288 00:11:35.350 --> 00:11:36.390 however, takes into account
289 00:11:36.390 --> 00:11:38.170 both landscape wildfire risk
290 00:11:38.170 --> 00:11:40.100 and socio-economic factors
291 00:11:40.100 --> 00:11:43.230 to determine how likely an area's to adapt to

292 00:11:43.230 --> 00:11:45.050 and recover from a wildfire.
293 00:11:45.050 --> 00:11:46.410 They measure it by using data
294 00:11:46.410 --> 00:11:49.880 from the 2014 census census on race,
295 00:11:49.880 --> 00:11:52.820 income, language, education, housing,
296 00:11:52.820 --> 00:11:54.740 and several other factors.
297 00:11:54.740 --> 00:11:56.280 The research has found that communities
298 00:11:56.280 --> 00:11:58.980 of color specifically those census tracts
299 00:11:58.980 --> 00:12:01.320 within majority black, Latino,
300 00:12:01.320 --> 00:12:05.170 or Native American, are 50% more vulnerable
301 00:12:05.170 --> 00:12:07.990 to wildfires compared to other census tracts.
302 00:12:07.990 --> 00:12:11.270 This research shows that the 29 million Amer-
icans
303 00:12:11.270 --> 00:12:13.860 who live in areas with significant chance
304 00:12:13.860 --> 00:12:16.570 of extreme wildfires are white
305 00:12:16.570 --> 00:12:19.360 and social economically secure.
306 00:12:19.360 --> 00:12:21.580 Traditional analysis often obscure the fact
307 00:12:21.580 --> 00:12:22.590 that black Latino
308 00:12:22.590 --> 00:12:25.270 and Native American people have worse
prospects
309 00:12:25.270 --> 00:12:26.853 for recovery from wildfire.
310 00:12:28.390 --> 00:12:29.223 In California,
311 00:12:29.223 --> 00:12:32.460 while many of these fire prone places
312 00:12:32.460 --> 00:12:35.700 are largely populated by higher income groups,
313 00:12:35.700 --> 00:12:37.640 they are also include hundreds of thousands
314 00:12:37.640 --> 00:12:39.180 of low income individuals
315 00:12:39.180 --> 00:12:40.560 who lack the resources
316 00:12:42.692 --> 00:12:45.330 to prepare or recover from the wildfire.
317 00:12:45.330 --> 00:12:47.250 These numbers will likely surge according
318 00:12:47.250 --> 00:12:50.860 to the California fourth Climate Assessment
Report,
319 00:12:50.860 --> 00:12:53.850 which projects at the state's wildfire burn area
320 00:12:53.850 --> 00:12:57.500 will increase by 77% by the end of the century.

321 00:12:57.500 --> 00:12:59.040 The State of California
322 00:12:59.040 --> 00:13:02.780 recently just updated their own maps
323 00:13:02.780 --> 00:13:05.180 to include social vulnerability
324 00:13:05.180 --> 00:13:06.750 but until recently,
325 00:13:06.750 --> 00:13:10.260 they did not have any wildfire maps
326 00:13:10.260 --> 00:13:12.420 based on social vulnerability.
327 00:13:12.420 --> 00:13:13.810 Understanding social vulnerability,
328 00:13:13.810 --> 00:13:15.690 particularly for undocumented immigrants
329 00:13:15.690 --> 00:13:18.570 is important because even existing social border
330 00:13:18.570 --> 00:13:20.570 building maps such as the one we see here
331 00:13:20.570 --> 00:13:23.710 by the University of Washington are still inadequate.
332 00:13:23.710 --> 00:13:26.740 If we zero in on the communities
333 00:13:26.740 --> 00:13:30.190 and counties of Santa Barbara and Ventura County,
334 00:13:30.190 --> 00:13:32.520 it shows that it has a low level
335 00:13:32.520 --> 00:13:34.670 of social vulnerability to wildfire.
336 00:13:34.670 --> 00:13:36.320 That's because there's a high level
337 00:13:36.320 --> 00:13:39.350 of high income individuals in Santa Barbara Ventura
338 00:13:39.350 --> 00:13:41.990 and moreover, because undocumented immigrants
339 00:13:41.990 --> 00:13:45.490 are often undercounted in the US Census,
340 00:13:45.490 --> 00:13:47.310 so it doesn't accurately show
341 00:13:47.310 --> 00:13:49.210 that the level of social vulnerability
342 00:13:49.210 --> 00:13:50.610 doesn't have that a contextual,
343 00:13:50.610 --> 00:13:54.393 what they call contextual vulnerability analysis,
344 00:13:56.330 --> 00:13:57.210 identifying those
345 00:13:57.210 --> 00:13:58.370 that are most socially vulnerable,
346 00:13:58.370 --> 00:14:01.250 it's important because in California Rural low income

347 00:14:01.250 --> 00:14:02.372 and immigrant communities,
 348 00:14:02.372 --> 00:14:05.460 residents often do not have the required re-
 sources
 349 00:14:05.460 --> 00:14:08.150 to pay for insurance, rebuild
 350 00:14:08.150 --> 00:14:10.280 or to invest in fire safety,
 351 00:14:10.280 --> 00:14:12.853 which increases their vulnerability to wildfire.
 352 00:14:14.130 --> 00:14:15.990 Such outcomes occurring during
 353 00:14:15.990 --> 00:14:16.910 and after wildfires
 354 00:14:16.910 --> 00:14:19.760 have major environmental justice implications
 355 00:14:19.760 --> 00:14:21.300 and that certain populations
 356 00:14:21.300 --> 00:14:23.440 due to their socio economic status,
 357 00:14:23.440 --> 00:14:25.580 must live with the disproportionate share
 358 00:14:25.580 --> 00:14:27.010 of environmental impacts
 359 00:14:27.010 --> 00:14:28.930 and suffer the related public health
 360 00:14:28.930 --> 00:14:30.603 and quality of life burdens.
 361 00:14:31.920 --> 00:14:32.753 In a few moments,
 362 00:14:32.753 --> 00:14:35.800 I'm gonna jump into the case study
 363 00:14:35.800 --> 00:14:38.860 and look at the disaster impacts
 364 00:14:38.860 --> 00:14:40.660 from the Thomas wildfire,
 365 00:14:40.660 --> 00:14:43.040 but first, I would like to provide some back-
 ground
 366 00:14:43.040 --> 00:14:45.910 on the fire and some demographics
 367 00:14:45.910 --> 00:14:49.230 on undocumented immigrants in the region.
 368 00:14:49.230 --> 00:14:51.680 On December 4th, 2017,
 369 00:14:51.680 --> 00:14:54.110 the Thomas Fire started north of the city
 370 00:14:54.110 --> 00:14:56.080 of Santa Paula and Ventura County,
 371 00:14:56.080 --> 00:14:59.100 it grew quickly to nearly 31,000 acres
 372 00:14:59.100 --> 00:15:00.390 or 50 square miles
 373 00:15:00.390 --> 00:15:02.210 in less than 12 hours,
 374 00:15:02.210 --> 00:15:03.850 its explosive growth was driven
 375 00:15:03.850 --> 00:15:06.170 by a combination of climactic events

376 00:15:06.170 --> 00:15:08.890 including dry foliage, low humidity
 377 00:15:08.890 --> 00:15:10.510 and intense Santa Ana winds
 378 00:15:10.510 --> 00:15:13.360 that gusted up to 60 miles per hour.
 379 00:15:13.360 --> 00:15:15.290 At the time of final containment
 380 00:15:15.290 --> 00:15:17.930 on January 20th, 2018,
 381 00:15:17.930 --> 00:15:19.060 40 days later,
 382 00:15:19.060 --> 00:15:20.860 the Thomas Fire would be classified
 383 00:15:20.860 --> 00:15:22.620 as a second largest wildfire
 384 00:15:22.620 --> 00:15:24.270 in California's history.
 385 00:15:24.270 --> 00:15:26.520 The firestorm affected hundreds of thousands
 386 00:15:26.520 --> 00:15:28.960 of residents in the counties of Ventura
 387 00:15:28.960 --> 00:15:30.050 and Santa Barbara,
 388 00:15:30.050 --> 00:15:32.000 resulting in massive blackouts,
 389 00:15:32.000 --> 00:15:34.280 destruction of over 1000 buildings
 390 00:15:34.280 --> 00:15:37.120 and the fatality of one firefighter,
 391 00:15:37.120 --> 00:15:39.460 media outlets across the country focus
 392 00:15:39.460 --> 00:15:41.530 on news reports and loss of coastal
 393 00:15:41.530 --> 00:15:42.770 and hillside mansions
 394 00:15:42.770 --> 00:15:45.893 and impacts to wealthy farm owners and home-
 owners.
 395 00:15:46.870 --> 00:15:48.060 The Thomas Fire however,
 396 00:15:48.060 --> 00:15:51.220 not only destroyed expensive property and
 crops
 397 00:15:51.220 --> 00:15:53.120 but it also endanger the health
 398 00:15:53.120 --> 00:15:54.340 and livelihood of thousands
 399 00:15:54.340 --> 00:15:56.150 of undocumented immigrants.
 400 00:15:56.150 --> 00:15:57.510 California is home
 401 00:15:57.510 --> 00:16:01.200 to an estimated 2.5 million undocumented
 immigrants,
 402 00:16:01.200 --> 00:16:02.428 many of whom are foreign workers
 403 00:16:02.428 --> 00:16:04.970 or employed in service jobs
 404 00:16:04.970 --> 00:16:07.200 such as housekeeping and landscaping.

405 00:16:07.200 --> 00:16:09.270 In Ventura and Santa Barbara Counties
 406 00:16:09.270 --> 00:16:11.610 undocumented immigrants are estimated
 407 00:16:11.610 --> 00:16:13.962 to account for more than 9%
 408 00:16:13.962 --> 00:16:17.350 of the total population or 111,000 people.
 409 00:16:17.350 --> 00:16:19.630 So Ventura and Santa Barbara counties
 410 00:16:19.630 --> 00:16:23.080 are heavily fire prone and drought impacted
 area,
 411 00:16:23.080 --> 00:16:25.030 the landscape and between mountains
 412 00:16:25.030 --> 00:16:26.800 and oceans creates vulnerabilities
 413 00:16:26.800 --> 00:16:28.530 and housing, transportation
 414 00:16:28.530 --> 00:16:31.100 and the infrastructure in the region.
 415 00:16:31.100 --> 00:16:32.740 It's a major agricultural
 416 00:16:32.740 --> 00:16:37.740 and tourism industries with low rates immi-
 grant workforce
 417 00:16:37.870 --> 00:16:39.800 and there's a high level racial
 418 00:16:39.800 --> 00:16:42.700 and economic inequality and a lack of political
 419 00:16:42.700 --> 00:16:44.323 and economic inclusion.
 420 00:16:48.630 --> 00:16:49.610 While relief efforts
 421 00:16:49.610 --> 00:16:51.630 in the Thomas Fire have largely been praised
 422 00:16:51.630 --> 00:16:54.880 as effective, immigrant workers
 423 00:16:54.880 --> 00:16:56.450 were especially impacted from the fire
 424 00:16:56.450 --> 00:16:58.160 due to the loss of employment,
 425 00:16:58.160 --> 00:17:00.700 the lack of evacuation information
 426 00:17:00.700 --> 00:17:02.030 in their native language,
 427 00:17:02.030 --> 00:17:03.530 confusion about eligibility
 428 00:17:03.530 --> 00:17:05.890 for Disaster Relief Services
 429 00:17:05.890 --> 00:17:07.660 and port infrastructure and housing
 430 00:17:07.660 --> 00:17:09.220 in immigrant communities,
 431 00:17:09.220 --> 00:17:11.920 undocumented immigrants socio-economic sit-
 uation
 432 00:17:11.920 --> 00:17:13.680 is usually precarious.
 433 00:17:13.680 --> 00:17:16.140 However, that wildfire disaster intensified

434 00:17:16.140 --> 00:17:18.390 they're already difficult situation.
 435 00:17:18.390 --> 00:17:20.530 The Thomas Fire reviewed revealed
 436 00:17:20.530 --> 00:17:22.560 how undocumented immigrants
 437 00:17:22.560 --> 00:17:25.140 and those with seasonal work via visas
 438 00:17:25.140 --> 00:17:27.150 require special consideration
 439 00:17:27.150 --> 00:17:28.750 and disaster planning.
 440 00:17:28.750 --> 00:17:30.840 These individuals are often afraid
 441 00:17:30.840 --> 00:17:33.140 to seek help and restitution during
 442 00:17:33.140 --> 00:17:35.610 and after a wildfire disaster
 443 00:17:35.610 --> 00:17:37.230 for fear of deportation,
 444 00:17:37.230 --> 00:17:39.600 undocumented immigrants are also unable
 445 00:17:39.600 --> 00:17:41.610 to access Disaster Relief Services
 446 00:17:41.610 --> 00:17:43.280 because of language barriers
 447 00:17:43.280 --> 00:17:44.240 and prohibition
 448 00:17:44.240 --> 00:17:45.840 from assessing federal disaster
 449 00:17:45.840 --> 00:17:47.880 relief assistant programmes.
 450 00:17:47.880 --> 00:17:48.730 On this picture
 451 00:17:48.730 --> 00:17:50.730 shows the two community research partners
 452 00:17:50.730 --> 00:17:53.240 that I work with on this co-authored
 453 00:17:53.240 --> 00:17:56.380 the Mixteco Indígena Community Organizing
 Project
 454 00:17:56.380 --> 00:17:57.213 or MICOP
 455 00:17:57.213 --> 00:18:00.850 and that's a picture of Genevieve Flores-Haro,
 456 00:18:00.850 --> 00:18:01.760 one of the co-authors,
 457 00:18:01.760 --> 00:18:03.570 she's holding in her hands,
 458 00:18:03.570 --> 00:18:06.600 a couple boxes of N95 masks
 459 00:18:06.600 --> 00:18:09.860 that they were distributing to farm workers
 460 00:18:09.860 --> 00:18:10.890 because employers
 461 00:18:10.890 --> 00:18:13.452 and supervisors were not providing PPEE
 462 00:18:13.452 --> 00:18:16.940 on even though there was a toxic smoke cir-
 culated

463 00:18:16.940 --> 00:18:19.500 in air as these these workers laboured
464 00:18:19.500 --> 00:18:20.690 into the fields.
465 00:18:20.690 --> 00:18:23.840 Also on the right hand side is the other committee
466 00:18:23.840 --> 00:18:26.460 to co-author on the Central Coast Alliance United
467 00:18:26.460 --> 00:18:27.660 for a Sustainable Economy,
468 00:18:27.660 --> 00:18:28.840 that's Lucas Zucker
469 00:18:28.840 --> 00:18:31.380 and you see he's on top of empty boxes
470 00:18:31.380 --> 00:18:34.140 of thousands of N95 masks
471 00:18:34.140 --> 00:18:36.490 that were distributed because the county,
472 00:18:36.490 --> 00:18:37.990 the government, the federal government,
473 00:18:37.990 --> 00:18:40.410 as well as supervisors
474 00:18:40.410 --> 00:18:43.793 and farm owners did not pass these out.
475 00:18:50.311 --> 00:18:52.280 Governments in the region overlook the needs
476 00:18:52.280 --> 00:18:54.040 of low income farmers, Spanish
477 00:18:54.040 --> 00:18:56.100 and indigenous Mixtecal speakers
478 00:18:56.100 --> 00:18:57.700 and immigrant families.
479 00:18:57.700 --> 00:19:00.640 Ventura and Santa Barbara counties are both home
480 00:19:00.640 --> 00:19:03.450 to a growing indigenous Mexican population.
481 00:19:03.450 --> 00:19:07.080 It is estimated that over 25,000 indigenous Oaxacan people
482 00:19:07.080 --> 00:19:08.610 from southern Mexico live
483 00:19:08.610 --> 00:19:10.440 and work in Ventura County.
484 00:19:10.440 --> 00:19:12.010 Well, Santa Barbara County is home
485 00:19:12.010 --> 00:19:15.400 to a population estimated at 29,000,
486 00:19:15.400 --> 00:19:18.710 concentrated in labour intensive sectors such as row crops
487 00:19:18.710 --> 00:19:21.210 and cut flowers, indigenous migrants
488 00:19:21.210 --> 00:19:22.720 performing an increasing amount
489 00:19:22.720 --> 00:19:24.360 of the arduous labour

490 00:19:24.360 --> 00:19:26.450 which contributes to the profitability
491 00:19:26.450 --> 00:19:29.070 and affordability of fresh fruits and vegetables.
492 00:19:29.070 --> 00:19:30.410 In particular, Mixtec people
493 00:19:30.410 --> 00:19:32.400 in Ventura County are culturally
494 00:19:32.400 --> 00:19:34.460 and linguistically isolated.
495 00:19:34.460 --> 00:19:35.700 Many are illiterate
496 00:19:35.700 --> 00:19:38.500 and most speak neither Spanish nor English
497 00:19:38.500 --> 00:19:40.700 but only their native language Mixtecal
498 00:19:40.700 --> 00:19:42.630 which is only oral.
499 00:19:42.630 --> 00:19:43.680 It is important to note
500 00:19:43.680 --> 00:19:45.710 that Mixtec people are not Hispanic
501 00:19:45.710 --> 00:19:48.280 or Latino but are indigenous.
502 00:19:48.280 --> 00:19:49.570 They're often homogenized
503 00:19:49.570 --> 00:19:53.053 with the general Latino population.
504 00:19:54.610 --> 00:19:56.890 The fact that they often cannot communicate
505 00:19:56.890 --> 00:19:57.723 with people
506 00:19:57.723 --> 00:19:59.280 beyond their own indigenous communities
507 00:19:59.280 --> 00:20:00.150 and pizza building,
508 00:20:00.150 --> 00:20:02.400 obtain appropriate health care, housing,
509 00:20:02.400 --> 00:20:05.050 education, negotiate with their employers
510 00:20:05.050 --> 00:20:06.660 to improve their work situation
511 00:20:06.660 --> 00:20:09.600 and exercise their basic civil rights,
512 00:20:09.600 --> 00:20:10.950 with these variables in mind,
513 00:20:10.950 --> 00:20:13.500 our research adopts the work in the field
514 00:20:13.500 --> 00:20:14.333 of public health
515 00:20:14.333 --> 00:20:15.670 that examines issues
516 00:20:15.670 --> 00:20:18.450 of intersectionality,
517 00:20:18.450 --> 00:20:20.120 that is how social categories
518 00:20:20.120 --> 00:20:23.960 such as gender, class, race, indigeneity,
519 00:20:23.960 --> 00:20:24.960 immigration status
520 00:20:24.960 --> 00:20:27.340 and other class aspects of human identity

521 00:20:27.340 --> 00:20:30.170 intersect with wildfire disaster.
 522 00:20:30.170 --> 00:20:32.510 The concept of intersectionality has been used
 523 00:20:32.510 --> 00:20:35.550 to highlight how these categories of culture
 524 00:20:35.550 --> 00:20:37.990 and identity overlap hiding in
 525 00:20:37.990 --> 00:20:40.180 the effects of discrimination,
 526 00:20:40.180 --> 00:20:42.450 exclusion, social inequality
 527 00:20:42.450 --> 00:20:44.650 and systemic injustice in the lives
 528 00:20:44.650 --> 00:20:46.040 of specific individuals,
 529 00:20:46.040 --> 00:20:49.440 an intersectional approach to wildfire disaster,
 530 00:20:49.440 --> 00:20:51.720 it emphasizes how certain people
 531 00:20:51.720 --> 00:20:53.670 and groups suffer worse effects
 532 00:20:53.670 --> 00:20:56.420 because of overlapping factors
 533 00:20:56.420 --> 00:20:58.120 that are often measured separately
 534 00:20:59.920 --> 00:21:00.753 and this respect,
 535 00:21:00.753 --> 00:21:02.940 we define social vulnerability to welfare
 536 00:21:02.940 --> 00:21:05.360 as comprised of the risk of exposure,
 537 00:21:05.360 --> 00:21:06.610 the likelihood that people
 538 00:21:06.610 --> 00:21:08.790 will be affected, sensitivity,
 539 00:21:08.790 --> 00:21:11.700 the degree to which people will be affected
 540 00:21:11.700 --> 00:21:13.060 and adaptive capacity,
 541 00:21:13.060 --> 00:21:14.790 the ability of people to prepare
 542 00:21:14.790 --> 00:21:17.530 and, or recover from a wildfire
 543 00:21:17.530 --> 00:21:19.683 based on available resources.
 544 00:21:22.190 --> 00:21:23.710 Moreover, we ask the question
 545 00:21:23.710 --> 00:21:25.490 of what does adaptive capacity mean
 546 00:21:25.490 --> 00:21:26.830 for migrant communities?
 547 00:21:26.830 --> 00:21:28.830 Most of the literature on adapting communi-
 ties
 548 00:21:28.830 --> 00:21:30.050 to wildfire focuses
 549 00:21:30.050 --> 00:21:33.980 on redesigning communities focus on home-
 owners,

550 00:21:33.980 --> 00:21:36.380 how can we design our homes and buildings
 551 00:21:36.380 --> 00:21:38.280 through land use and building codes
 552 00:21:38.280 --> 00:21:39.200 but what does this mean
 553 00:21:39.200 --> 00:21:41.790 to migrant undocumented communities
 554 00:21:41.790 --> 00:21:43.670 on terms of language access,
 555 00:21:43.670 --> 00:21:45.720 worker health and safety rights,
 556 00:21:45.720 --> 00:21:47.310 immigration status and access
 557 00:21:47.310 --> 00:21:48.870 to disaster relief
 558 00:21:48.870 --> 00:21:51.703 and housing and transportation impacts.
 559 00:21:53.290 --> 00:21:54.920 So now I'm finally gonna jump
 560 00:21:54.920 --> 00:21:55.970 into some of the impacts
 561 00:21:55.970 --> 00:22:00.070 that were present through the Thomas wild-
 fire.
 562 00:22:00.070 --> 00:22:03.300 There was an equity in terms of language
 access
 563 00:22:03.300 --> 00:22:05.030 to Emergency Information,
 564 00:22:05.030 --> 00:22:09.010 while this area has a large proportion
 565 00:22:09.010 --> 00:22:11.720 of Latino and Hispanic individuals
 566 00:22:11.720 --> 00:22:13.180 that speak Spanish in the area
 567 00:22:13.180 --> 00:22:15.980 and have been living here for generations.
 568 00:22:15.980 --> 00:22:18.270 The counties of interest Santa Barbara coun-
 ties
 569 00:22:18.270 --> 00:22:21.410 did not have anyone in their emergency ser-
 vices
 570 00:22:21.410 --> 00:22:23.570 to do live translations,
 571 00:22:23.570 --> 00:22:27.720 so that the fire raged on for nearly 10 days
 572 00:22:27.720 --> 00:22:29.610 and there was no translation
 573 00:22:29.610 --> 00:22:30.910 of Emergency Information
 574 00:22:30.910 --> 00:22:33.330 that included advisory alerts
 575 00:22:33.330 --> 00:22:36.230 about poor air quality,
 576 00:22:36.230 --> 00:22:39.090 about sheltering about emergency evacuations
 577 00:22:39.090 --> 00:22:41.130 about boiler or alerts.

578 00:22:41.130 --> 00:22:42.510 What they did on the fourth day
579 00:22:42.510 --> 00:22:45.010 is put a Google Translate tool on top
580 00:22:45.010 --> 00:22:45.940 in their websites
581 00:22:45.940 --> 00:22:50.620 as well as on top of Emergency Information
582 00:22:50.620 --> 00:22:53.010 and it had one sentence in Spanish
583 00:22:53.010 --> 00:22:56.140 that read that if you don't speak English,
584 00:22:56.140 --> 00:22:59.390 please take this Emergency Information note
585 00:22:59.390 --> 00:23:01.630 to somebody that can translate it for you
586 00:23:01.630 --> 00:23:03.640 and then the Google Translate
587 00:23:03.640 --> 00:23:06.010 at the time this was about three years ago
588 00:23:06.010 --> 00:23:09.290 was not as refined as it is today
589 00:23:09.290 --> 00:23:13.260 and when you would type in a wildfire,
590 00:23:13.260 --> 00:23:16.310 it would be translated as hairbrush
591 00:23:16.310 --> 00:23:19.790 so there was a lot of inequities that occurred,
592 00:23:19.790 --> 00:23:21.440 it took about 10 days
593 00:23:21.440 --> 00:23:25.500 for the state of California to land somebody
594 00:23:25.500 --> 00:23:28.420 from the Governor's Office of Emergency services
595 00:23:28.420 --> 00:23:30.500 to help do light translations
596 00:23:30.500 --> 00:23:31.730 but in the interim,
597 00:23:31.730 --> 00:23:34.550 MICOP and CAUSE the two communities organizations
598 00:23:34.550 --> 00:23:36.710 had to do all the translations
599 00:23:36.710 --> 00:23:38.900 in their social media platforms.
600 00:23:38.900 --> 00:23:42.300 They have a low power radio station,
601 00:23:42.300 --> 00:23:44.680 that they're able to translate in Spanish
602 00:23:44.680 --> 00:23:45.513 and Mixtecal
603 00:23:45.513 --> 00:23:48.490 and a couple other other commonly spoken languages
604 00:23:48.490 --> 00:23:49.323 in the area
605 00:23:51.530 --> 00:23:52.450 and as you can see,
606 00:23:52.450 --> 00:23:56.090 these are some of the air quality advisories

607 00:23:56.090 --> 00:23:58.231 in the wildfire in Ventura,
 608 00:23:58.231 --> 00:24:01.090 the maroon and dark purple areas
 609 00:24:01.090 --> 00:24:03.320 is where a lot of the farms are working
 610 00:24:03.320 --> 00:24:07.310 and these are mandatory evacuation zones
 611 00:24:07.310 --> 00:24:09.070 but oftentimes, still,
 612 00:24:09.070 --> 00:24:10.510 farm workers are still entering
 613 00:24:10.510 --> 00:24:12.630 into these mandatory evacuation zones
 614 00:24:12.630 --> 00:24:15.840 to work in and protect some of the crops
 615 00:24:15.840 --> 00:24:17.566 from smoke and ash.
 616 00:24:17.566 --> 00:24:19.400 As you see from here,
 617 00:24:19.400 --> 00:24:21.360 there's a safe drinking water access.
 618 00:24:21.360 --> 00:24:23.150 So none of this was translated
 619 00:24:23.150 --> 00:24:24.800 for nearly two weeks
 620 00:24:24.800 --> 00:24:28.670 and MICOP through the radio station
 621 00:24:28.670 --> 00:24:32.240 and other social communication platforms was
 able
 622 00:24:32.240 --> 00:24:33.540 to translate that
 623 00:24:33.540 --> 00:24:36.373 and get it to about 30,000 people in the region.
 624 00:24:37.634 --> 00:24:39.560 The community, as I mentioned before,
 625 00:24:39.560 --> 00:24:40.393 had to step up
 626 00:24:40.393 --> 00:24:43.600 because there was no official government re-
 sponse.
 627 00:24:43.600 --> 00:24:44.830 Even though these individuals
 628 00:24:44.830 --> 00:24:47.640 have been living here for four generations.
 629 00:24:47.640 --> 00:24:51.880 As the counties there Santa Barbara, Ventura
 630 00:24:51.880 --> 00:24:56.490 and even the state decided not to invest
 631 00:24:56.490 --> 00:24:59.190 any resources ahead of disasters
 632 00:24:59.190 --> 00:25:03.920 and protecting the socially vulnerable com-
 munity.
 633 00:25:03.920 --> 00:25:05.357 So they had a lot of hazard
 634 00:25:05.357 --> 00:25:08.100 and mitigation plans in effect,

635 00:25:08.100 --> 00:25:10.490 but none of them talked about social vulnerability
636 00:25:10.490 --> 00:25:13.190 and specifically undocumented immigrants
637 00:25:13.190 --> 00:25:14.170 and farm workers
638 00:25:15.450 --> 00:25:18.220 and one of the major impacts was worker health
639 00:25:18.220 --> 00:25:19.130 and safety impacts
640 00:25:19.130 --> 00:25:20.740 as I showed in the previous slides,
641 00:25:20.740 --> 00:25:25.220 MICOP and CAUSE had to distribute PP equipment
642 00:25:25.220 --> 00:25:27.410 because this was not provided
643 00:25:27.410 --> 00:25:29.240 by the state county governments,
644 00:25:29.240 --> 00:25:31.360 let alone their employers.
645 00:25:31.360 --> 00:25:35.300 So they got some funds donated
646 00:25:35.300 --> 00:25:37.950 from private and other government sources
647 00:25:37.950 --> 00:25:41.450 to go and purchase some of these N95 masks,
648 00:25:41.450 --> 00:25:43.610 goggles and gloves as well
649 00:25:43.610 --> 00:25:46.320 and here are some of the interviews
650 00:25:46.320 --> 00:25:47.930 that we did from our research.
651 00:25:47.930 --> 00:25:48.781 Some of the farm workers,
652 00:25:48.781 --> 00:25:49.614 a farm worker from Oxford told us
653 00:25:49.614 --> 00:25:50.447 during the fire I worked three days
654 00:25:50.447 --> 00:25:51.280 without a mask.
655 00:25:51.280 --> 00:25:52.113 It caused me headaches and watery eyes
656 00:25:52.113 --> 00:25:52.946 as well as a cough.
657 00:25:52.946 --> 00:25:53.779 We were scared
658 00:25:53.779 --> 00:25:54.612 because we were very near
659 00:25:54.612 --> 00:25:55.445 where the fire was occurring.
660 00:25:55.445 --> 00:25:56.278 The masks were not handed out
661 00:25:56.278 --> 00:25:57.111 until the city came to regulate.
662 00:25:57.111 --> 00:25:57.944 Another farm worker told us,
663 00:25:57.944 --> 00:25:58.777 we all got sick our throats closed

664 00:25:58.777 --> 00:25:59.610 in from breathing too much smoke
665 00:25:59.610 --> 00:26:00.443 and our kids couldn't go to school.
666 00:26:00.443 --> 00:26:01.276 We had to buy mask and medicine for our
throats
667 00:26:01.276 --> 00:26:02.109 and some goggles because my eyes were irri-
tated
668 00:26:02.109 --> 00:26:02.942 when I worked.
669 00:26:02.942 --> 00:26:03.775 There was also economic
670 00:26:03.775 --> 00:26:04.608 and health impacts on workers,
671 00:26:04.608 --> 00:26:05.441 in particular, some of these farms did burn
down
672 00:26:05.441 --> 00:26:06.274 or it was just too hazardous to go work
673 00:26:06.274 --> 00:26:07.107 so they were shut down.
674 00:26:07.107 --> 00:26:07.940 So a lot of people lost income
675 00:26:07.940 --> 00:26:08.773 and a waste to support their family as well.
676 00:26:08.773 --> 00:26:09.606 There was black and there was mudslides
677 00:26:09.606 --> 00:26:10.439 after the fires that occurred finished
678 00:26:10.439 --> 00:26:11.272 in mid January,
679 00:26:11.272 --> 00:26:12.105 there was a torrential rains that came
680 00:26:12.105 --> 00:26:12.938 and created mudslides,
681 00:26:12.938 --> 00:26:13.771 major mudslides that that were caused
682 00:26:13.771 --> 00:26:14.604 from the fire debris as well
683 00:26:14.604 --> 00:26:15.437 and that also killed additional people
684 00:26:15.437 --> 00:26:16.270 that will we'll be speaking about come shortly.
685 00:26:16.270 --> 00:26:17.103 A domestic worker service workers
686 00:26:17.103 --> 00:26:17.936 also were impacted.
687 00:26:17.936 --> 00:26:18.769 Some of these mansions
688 00:26:18.769 --> 00:26:19.602 in the states were burned down
689 00:26:19.602 --> 00:26:20.435 to the ground and he did not have any sources
690 00:26:20.435 --> 00:26:21.268 of income as as undocumented migrants there
691 00:26:21.268 --> 00:26:22.101 during eligible for unemployment relief funds
692 00:26:22.101 --> 00:26:22.934 as well as a federal disaster relief funds.

693 00:26:22.934 --> 00:26:23.767 One of our informants one of the people
694 00:26:23.767 --> 00:26:24.600 we interviewed also told us
695 00:26:24.600 --> 00:26:25.433 about the neck Woody's that were happening.
696 00:26:25.433 --> 00:26:26.266 For instance, one of the domestic workers told
us
697 00:26:26.266 --> 00:26:27.099 as well as the Los Angeles Times
698 00:26:27.099 --> 00:26:27.932 that while her her employer threat fled the
home
699 00:26:27.932 --> 00:26:28.765 because it was a mandatory evacuation zone,
700 00:26:28.765 --> 00:26:29.598 she asked a domestic worker to stay
701 00:26:29.598 --> 00:26:30.431 and safeguard the house
702 00:26:30.431 --> 00:26:31.264 and to be able to get a couple items
703 00:26:31.264 --> 00:26:32.097 if the fire would get too close to the house.
704 00:26:32.097 --> 00:26:32.930 So these individuals were asked,
705 00:26:32.930 --> 00:26:33.763 not forced but asked and pressure
706 00:26:33.763 --> 00:26:34.596 to stay in mandatory fire evacuation zone.
707 00:26:34.596 --> 00:26:35.429 Here's some additional quotes
708 00:26:35.429 --> 00:26:36.262 from one landscaper in Santa Barbara.
709 00:26:36.262 --> 00:26:37.095 I could not get to the homes
710 00:26:37.095 --> 00:26:37.928 where I work because the streets were close
711 00:26:37.928 --> 00:26:38.761 to the homes I worked at were destroyed.
712 00:26:38.761 --> 00:26:39.594 One of my good friends was lost
713 00:26:39.594 --> 00:26:40.427 during the most mudflow.
714 00:26:40.427 --> 00:26:41.260 He had only been living in Montecito
715 00:26:41.260 --> 00:26:42.093 for three weeks before he died.
716 00:26:42.093 --> 00:26:42.926 I myself a cancer survivor
717 00:26:42.926 --> 00:26:43.759 and the only one who provides for the family.
718 00:26:43.759 --> 00:26:44.592 Another worker told us the day
719 00:26:44.592 --> 00:26:45.425 of the fire started the sky was covered with
smoke
720 00:26:45.425 --> 00:26:46.258 and we were sent home.
721 00:26:46.258 --> 00:26:47.091 The next day we didn't work

722 00:26:47.091 --> 00:26:47.924 because it was dangerous due to the fire.
 723 00:26:47.924 --> 00:26:48.757 We lost power because it was cut off
 724 00:26:48.757 --> 00:26:49.590 by the fire and we lost food
 725 00:26:49.590 --> 00:26:50.423 and melt for our kids. During the mudslides.
 726 00:26:50.423 --> 00:26:51.256 We couldn't get to work
 727 00:26:51.256 --> 00:26:52.089 and we're told to stay home for two days.
 728 00:26:52.089 --> 00:26:52.922 As I mentioned before immigration status
 729 00:26:52.922 --> 00:26:53.755 and disaster aid really limits people's
 730 00:26:53.755 --> 00:26:54.588 in adaptive capacity,
 731 00:26:54.588 --> 00:26:55.421 how they're going to bounce back
 732 00:26:55.421 --> 00:26:56.254 from the disaster and recover,
 733 00:26:56.254 --> 00:26:57.087 so that they're not provided
 734 00:26:57.087 --> 00:26:57.920 with government resources
 735 00:26:57.920 --> 00:26:58.753 even though they're contributing to the econ-
 omy
 736 00:26:58.753 --> 00:26:59.586 in our society.
 737 00:26:59.586 --> 00:27:00.419 As a result, migrant rights groups
 738 00:27:00.419 --> 00:27:01.252 and other social justice
 739 00:27:01.252 --> 00:27:02.085 and nonprofit groups in the region
 740 00:27:02.085 --> 00:27:02.918 create the 805 undock cufon this was modelled
 off
 741 00:27:02.918 --> 00:27:03.751 of the original undocumented Sonoma
 742 00:27:03.751 --> 00:27:04.584 and Napa County for the fires
 743 00:27:04.584 --> 00:27:05.417 that happen on about six months earlier on
 744 00:27:05.417 --> 00:27:06.250 and so this was modelled after Napa Sonoma
 745 00:27:06.250 --> 00:27:07.083 and as you can see from here
 746 00:27:07.083 --> 00:27:07.916 on total relief was provided
 747 00:27:07.916 --> 00:27:08.749 to nearly 2000 families
 748 00:27:08.749 --> 00:27:09.582 on almost 4000 undocumented people
 749 00:27:09.582 --> 00:27:10.415 and over 7000 mixed status individuals
 750 00:27:10.415 --> 00:27:11.248 and over \$2 million has been raised

751 00:27:11.248 --> 00:27:12.081 on their continued to raise as these fires
752 00:27:12.081 --> 00:27:12.914 and other COVID-19 persists
753 00:27:12.914 --> 00:27:13.747 and but often there's a waiting list
754 00:27:13.747 --> 00:27:14.580 because there's not enough funding on
755 00:27:14.580 --> 00:27:15.413 to support all undocumented families
756 00:27:15.413 --> 00:27:16.246 that want to be supported through the spine.
757 00:27:16.246 --> 00:27:17.079 It's important to note that these mix families
758 00:27:17.079 --> 00:27:17.912 that mix families should not have to go
759 00:27:17.912 --> 00:27:18.745 to a private disaster relief fund like this
760 00:27:18.745 --> 00:27:19.578 but many are for fear of on deportation
761 00:27:19.578 --> 00:27:20.411 because even though a mixed family is a family
762 00:27:20.411 --> 00:27:21.244 that has a US resident or US citizen
763 00:27:21.244 --> 00:27:22.077 and but there's also undocumented migrants
764 00:27:22.077 --> 00:27:22.910 within that household living
765 00:27:22.910 --> 00:27:23.743 in the same household
766 00:27:23.743 --> 00:27:24.576 and so they're eligible
767 00:27:24.576 --> 00:27:25.409 but by being residents or US citizens
768 00:27:25.409 --> 00:27:26.242 but under the Trump administration
769 00:27:26.242 --> 00:27:27.075 as you fill out, these FEMA forms,
770 00:27:27.075 --> 00:27:27.908 there is a disclosure there that states
771 00:27:27.908 --> 00:27:28.741 that this information may
772 00:27:28.741 --> 00:27:29.574 or may be shared with ice,
773 00:27:29.574 --> 00:27:30.407 which is immigration and customs,
774 00:27:30.407 --> 00:27:31.240 Customs and Immigration Services.
775 00:27:31.240 --> 00:27:32.073 So that really scares some families
776 00:27:32.073 --> 00:27:32.906 that are eligible for federal disaster relief
777 00:27:32.906 --> 00:27:33.739 from accessing it.
778 00:27:33.739 --> 00:27:34.572 So that that that sense of fear
779 00:27:34.572 --> 00:27:35.405 and sharing of information with ice is inten-
tional
780 00:27:35.405 --> 00:27:36.238 and really continue contributes

781 00:27:36.238 --> 00:27:37.071 to the rendering on this population invisible.
782 00:27:37.071 --> 00:27:37.904 Here's another quote
783 00:27:37.904 --> 00:27:38.737 on regarding the undocumented.
784 00:27:38.737 --> 00:27:39.570 My husband was deported,
785 00:27:39.570 --> 00:27:40.403 just before the fire,
786 00:27:40.403 --> 00:27:41.236 I was really struggling to find work in the
fields.
787 00:27:41.236 --> 00:27:42.069 I finally got hired the first week
788 00:27:42.069 --> 00:27:42.902 in December 2017
789 00:27:42.902 --> 00:27:43.735 but was let go once the fire
790 00:27:43.735 --> 00:27:44.568 and smoke grew too big
791 00:27:44.568 --> 00:27:45.401 and in the fruit spoil
792 00:27:45.401 --> 00:27:46.234 as the only breadwinner,
793 00:27:46.234 --> 00:27:47.067 I had to borrow money from friends
794 00:27:47.067 --> 00:27:47.900 and family to feed my kids.
795 00:27:47.900 --> 00:27:48.733 Our food went bad due to the power outage
796 00:27:48.733 --> 00:27:49.566 adding to our expenses.
797 00:27:49.566 --> 00:27:50.399 I am grateful for the DOC UFA,
798 00:27:50.399 --> 00:27:51.232 Funding Assistance,
799 00:27:51.232 --> 00:27:52.065 I am still in need to help
800 00:27:52.065 --> 00:27:52.898 and continue coming to MICOP for other
services.
801 00:27:52.898 --> 00:27:53.731 There was also a loss of regional housing stock.
802 00:27:53.731 --> 00:27:54.564 So it wasn't just manage mega mansions
803 00:27:54.564 --> 00:27:55.397 and wealthy individuals.
804 00:27:55.397 --> 00:27:56.230 There was also housing stock lost
805 00:27:56.230 --> 00:27:57.063 and some parts of Santa Barbara
806 00:27:57.063 --> 00:27:57.896 that were multi family housing
807 00:27:57.896 --> 00:27:58.729 but any California as you may know,
808 00:27:58.729 --> 00:27:59.562 like San Francisco, on the Central Coast,
809 00:27:59.562 --> 00:28:00.395 Santa Barbara,

810 00:28:00.395 --> 00:28:01.228 in particular has an affordable housing crunch.
 811 00:28:01.228 --> 00:28:02.061 So any loss of housing has an impact
 812 00:28:02.061 --> 00:28:02.894 throughout the region,
 813 00:28:02.894 --> 00:28:03.727 as people have to move to other housing,
 814 00:28:03.727 --> 00:28:04.560 to replace their homes.
 815 00:28:04.560 --> 00:28:05.393 So that increases the price
 816 00:28:05.393 --> 00:28:06.226 as a rental market and price gouging.
 817 00:28:06.226 --> 00:28:07.059 So there was instances
 818 00:28:07.059 --> 00:28:07.892 in some of these communities
 819 00:28:07.892 --> 00:28:08.725 in East Santa Barbara
 820 00:28:08.725 --> 00:28:09.558 where many of the workers live,
 821 00:28:09.558 --> 00:28:10.391 you had one large landowner,
 822 00:28:10.391 --> 00:28:11.224 increasing rent by at least \$300.
 823 00:28:11.224 --> 00:28:12.057 So there's a lot in equity
 824 00:28:12.057 --> 00:28:12.890 in terms of housing stock,
 825 00:28:12.890 --> 00:28:13.723 the protests essentially happened
 826 00:28:13.723 --> 00:28:14.556 after that price gouging
 827 00:28:14.556 --> 00:28:15.389 but this is an occurrence
 828 00:28:15.389 --> 00:28:16.222 that happens particularly a lot in undocu-
 mented,
 829 00:28:16.222 --> 00:28:17.055 migrant communities.
 830 00:28:17.055 --> 00:28:17.888 The land owners know
 831 00:28:17.888 --> 00:28:18.721 that they're often these individuals
 832 00:28:18.721 --> 00:28:19.554 are not going to tell the government
 833 00:28:19.554 --> 00:28:20.387 and so they feel that they can get away with
 this.
 834 00:28:20.387 --> 00:28:21.220 There was also loss of transportation infras-
 tructure.
 835 00:28:21.220 --> 00:28:22.053 This is a picture
 836 00:28:22.053 --> 00:28:22.886 of the one on one freeway one one highway.
 837 00:28:22.886 --> 00:28:26.844 So this is the major arterial highway
 838 00:28:26.844 --> 00:28:28.552 connecting Ventura County

839 00:28:28.552 --> 00:28:33.552 to Santa Barbara County,
840 00:28:34.010 --> 00:28:34.843 as I mentioned before the oceans on one side
841 00:28:34.843 --> 00:28:37.126 and then you have large mountains
842 00:28:37.126 --> 00:28:37.959 on the other side.
843 00:28:37.959 --> 00:28:42.959 So this is one of the most efficient,
844 00:28:52.792 --> 00:28:57.792 affordable ways to to reach Santa Barbara
845 00:29:05.550 --> 00:29:10.550 and Ventura counties
846 00:29:12.633 --> 00:29:14.841 but at the fire and the mudslides
847 00:29:14.841 --> 00:29:15.674 on blocked access
848 00:29:15.674 --> 00:29:19.757 to this area so workers could not get to work.
849 00:29:19.757 --> 00:29:20.590 So if you didn't have funds
850 00:29:20.590 --> 00:29:25.590 to find alternative forms of transportation,
851 00:33:31.548 --> 00:33:33.020 then you were really very out of luck
852 00:33:33.020 --> 00:33:35.700 and it was a situation
853 00:33:35.700 --> 00:33:38.030 where you would lose more income.
854 00:33:38.030 --> 00:33:40.400 So people with higher incomes were able
855 00:33:40.400 --> 00:33:42.430 to rent boats,
856 00:33:42.430 --> 00:33:43.390 they actually rented boats
857 00:33:43.390 --> 00:33:45.050 to get around the highway,
858 00:33:45.050 --> 00:33:48.770 other people bought expensive Amtrak tickets
859 00:33:48.770 --> 00:33:50.970 and then finally other people drove
860 00:33:50.970 --> 00:33:52.300 all the way around the mountains
861 00:33:52.300 --> 00:33:53.530 which took a lot much longer,
862 00:33:53.530 --> 00:33:55.700 a lot more gas to to get around
863 00:33:55.700 --> 00:33:57.880 but many undocumented immigrants don't
have
864 00:33:57.880 --> 00:33:58.870 that extra cash
865 00:33:58.870 --> 00:34:01.710 to do these alternative transportation modes
866 00:34:02.740 --> 00:34:05.900 and then, looking at the limitations,
867 00:34:05.900 --> 00:34:06.733 now I wanna jump
868 00:34:06.733 --> 00:34:08.380 into sort of the policy implications

869 00:34:08.380 --> 00:34:09.870 of some of our research
 870 00:34:09.870 --> 00:34:11.000 and particularly the limits
 871 00:34:11.000 --> 00:34:12.250 of vulnerability mapping,
 872 00:34:13.830 --> 00:34:14.980 current social vulnerability
 873 00:34:14.980 --> 00:34:17.830 mapping renders many minority
 874 00:34:17.830 --> 00:34:20.700 and poor communities of color invisible.
 875 00:34:20.700 --> 00:34:23.990 For example, the University of Washington
 map
 876 00:34:23.990 --> 00:34:25.780 shows Santa Barbara and Ventura counties
 877 00:34:25.780 --> 00:34:28.440 as having low levels of social vulnerability
 878 00:34:28.440 --> 00:34:29.840 due to the large proportion
 879 00:34:29.840 --> 00:34:32.660 of economically secure households in the re-
 gion,
 880 00:34:32.660 --> 00:34:34.890 however as we've shown in our research,
 881 00:34:34.890 --> 00:34:38.000 Latino and indigenous migrant communities
 882 00:34:38.000 --> 00:34:39.500 were among the most impacted
 883 00:34:39.500 --> 00:34:40.920 during the Thomas Fire.
 884 00:34:40.920 --> 00:34:42.760 Moreover, immigration status
 885 00:34:42.760 --> 00:34:44.470 has received little attention
 886 00:34:44.470 --> 00:34:46.253 and disaster vulnerability mapping.
 887 00:34:47.164 --> 00:34:48.350 Though a large proportion
 888 00:34:48.350 --> 00:34:50.130 of disaster studies have considered race
 889 00:34:50.130 --> 00:34:52.620 and ethnicity as the vulnerability factor
 890 00:34:52.620 --> 00:34:54.737 impacts experienced by migrants
 891 00:34:54.737 --> 00:34:57.893 require an intersectional research approach.
 892 00:34:59.950 --> 00:35:02.090 Current vulnerability mapping approach
 893 00:35:02.090 --> 00:35:04.620 also fails to account for the complex web
 894 00:35:04.620 --> 00:35:06.690 of impacts caused by disasters
 895 00:35:06.690 --> 00:35:09.050 far beyond destruction of property
 896 00:35:09.050 --> 00:35:11.410 within the perimeter of the fire itself.
 897 00:35:11.410 --> 00:35:13.960 Toxic smoke flows down from burning moun-
 tainside,

898 00:35:13.960 --> 00:35:15.920 settling in densely populated valleys
 899 00:35:15.920 --> 00:35:18.400 below threatening outdoor workers,
 900 00:35:18.400 --> 00:35:20.050 lavish hillside mansions are destroyed
 901 00:35:20.050 --> 00:35:24.760 or evacuated, leaving low income migrant
 gardeners,
 902 00:35:24.760 --> 00:35:27.380 housekeepers and caregivers unemployed.
 903 00:35:27.380 --> 00:35:29.540 Tourism throughout the region shuts down
 904 00:35:29.540 --> 00:35:32.220 putting thousands of hotel employees out of
 work.
 905 00:35:32.220 --> 00:35:33.250 From the loss of housing
 906 00:35:33.250 --> 00:35:35.330 and infrastructure to the closure of schools
 907 00:35:35.330 --> 00:35:36.600 and job sites,
 908 00:35:36.600 --> 00:35:38.690 multiple regions are impacted
 909 00:35:38.690 --> 00:35:39.940 beyond the census tracts
 910 00:35:39.940 --> 00:35:41.460 identified in mapping models
 911 00:35:41.460 --> 00:35:44.100 of buyer landscape risk zones.
 912 00:35:44.100 --> 00:35:46.530 For example, a low income migrant family
 913 00:35:46.530 --> 00:35:48.170 living outside of Bern area
 914 00:35:48.170 --> 00:35:50.610 whose loses several weeks of wages
 915 00:35:50.610 --> 00:35:52.900 without eligibility for federal
 916 00:35:52.900 --> 00:35:55.420 and state assistance may be more negatively
 917 00:35:55.420 --> 00:35:58.430 impacted than a higher income homeowner
 918 00:35:58.430 --> 00:36:01.150 who lives within the fire risk zone
 919 00:36:01.150 --> 00:36:02.460 whose property is replaced
 920 00:36:02.460 --> 00:36:04.380 by their homeowners insurance policy,
 921 00:36:04.380 --> 00:36:06.690 which also pays for hotel commendations
 922 00:36:06.690 --> 00:36:08.823 for them to stay in the interim.
 923 00:36:13.140 --> 00:36:14.710 The policy implication here
 924 00:36:14.710 --> 00:36:17.750 that I wanna drive home really
 925 00:36:17.750 --> 00:36:20.330 is that existing inequalities are exacerbated
 926 00:36:20.330 --> 00:36:21.470 during the disasters

927 00:36:21.470 --> 00:36:24.000 because there is no existing social safety net
928 00:36:24.000 --> 00:36:27.240 before a disaster to protect these individuals.
929 00:36:27.240 --> 00:36:29.700 So Disaster Risk Reduction must start
930 00:36:29.700 --> 00:36:31.360 with social integration of migrants
931 00:36:31.360 --> 00:36:32.953 before a disaster.
932 00:36:34.640 --> 00:36:36.050 So the COVID-19 pandemic,
933 00:36:36.050 --> 00:36:37.050 I could talk a little bit more
934 00:36:37.050 --> 00:36:40.670 about this in the Q&A, has really decimated
935 00:36:40.670 --> 00:36:42.710 some of these communities
936 00:36:42.710 --> 00:36:44.620 but this Thomas Fire
937 00:36:44.620 --> 00:36:46.840 that happened was three years ago
938 00:36:46.840 --> 00:36:50.913 and the fires in Northern California, Sonoma,
939 00:36:50.913 --> 00:36:55.770 Napa County happened about three years ago
as well
940 00:36:55.770 --> 00:36:58.010 and is since those fires
941 00:36:58.010 --> 00:36:59.495 that continue to happen
942 00:36:59.495 --> 00:37:02.620 these regions have become a little bit more
943 00:37:02.620 --> 00:37:04.400 proactive in disaster planning,
944 00:37:04.400 --> 00:37:06.050 particularly groups like MICOP
945 00:37:06.050 --> 00:37:07.570 and other migrant rights groups
946 00:37:07.570 --> 00:37:09.260 have really asserted their rights
947 00:37:09.260 --> 00:37:12.850 to speak as disaster experts
948 00:37:12.850 --> 00:37:15.270 and really have demanded to be
949 00:37:15.270 --> 00:37:16.490 in some of these county
950 00:37:16.490 --> 00:37:18.930 and state government meetings as stakeholders
951 00:37:18.930 --> 00:37:20.530 and disaster planning.
952 00:37:20.530 --> 00:37:22.770 So infrastructure through protests
953 00:37:22.770 --> 00:37:24.780 and advocacy has expanded
954 00:37:26.370 --> 00:37:29.930 to be able to provide more adequate resources
955 00:37:29.930 --> 00:37:32.770 to individuals during disasters and pandemics

956 00:37:32.770 --> 00:37:35.790 and as I talked to some of these migrant groups,

957 00:37:35.790 --> 00:37:37.320 they all tell me that

958 00:37:37.320 --> 00:37:40.740 while the COVID-19 pandemic has decimated

959 00:37:40.740 --> 00:37:42.880 those communities had it not been

960 00:37:42.880 --> 00:37:45.070 for the planning after the wildfires,

961 00:37:45.070 --> 00:37:47.680 disasters and these farm worker communities,

962 00:37:47.680 --> 00:37:50.770 the COVID-19 pandemic would have been far worse

963 00:37:50.770 --> 00:37:52.770 because they had at least three years

964 00:37:52.770 --> 00:37:57.490 to become experts and demand resources

965 00:37:57.490 --> 00:37:59.340 from the state and local governments.

966 00:38:00.340 --> 00:38:02.810 So the broader policy implication

967 00:38:02.810 --> 00:38:03.810 of this research

968 00:38:03.810 --> 00:38:06.610 is to ensure inclusive disaster planning

969 00:38:06.610 --> 00:38:09.840 that we must draw on migrant community knowledge,

970 00:38:09.840 --> 00:38:10.997 embrace migrant communities

971 00:38:10.997 --> 00:38:12.710 and disaster planning, response

972 00:38:12.710 --> 00:38:15.010 and recovery and bolster a lot

973 00:38:15.010 --> 00:38:18.130 of next indigenous civil society organizations capacity

974 00:38:18.130 --> 00:38:20.683 in disaster relief and planning efforts.

975 00:38:22.250 --> 00:38:24.240 So some outcomes that happened

976 00:38:24.240 --> 00:38:26.520 since a Thomas wildfire California

977 00:38:26.520 --> 00:38:30.080 has adopted some very culturally

978 00:38:30.080 --> 00:38:30.913 and linguistically

979 00:38:30.913 --> 00:38:34.620 inclusive disaster planning resources

980 00:38:34.620 --> 00:38:39.100 requiring county and state governments

981 00:38:39.100 --> 00:38:41.120 to provide language access

982 00:38:41.120 --> 00:38:42.660 to Emergency Information

983 00:38:42.660 --> 00:38:46.910 and that's also contingent disaster relief aid.

984 00:38:46.910 --> 00:38:48.880 So if you want state disaster relief aid,
 985 00:38:48.880 --> 00:38:50.940 you have to update your protocols
 986 00:38:50.940 --> 00:38:54.950 on disaster planning and your language access
 987 00:38:54.950 --> 00:38:57.780 and there's also been funding tied
 988 00:38:57.780 --> 00:39:00.040 to cultural competency and disaster planning
 989 00:39:00.040 --> 00:39:01.650 and climate resilient planning.
 990 00:39:01.650 --> 00:39:03.550 So these local governments have to show
 991 00:39:03.550 --> 00:39:05.180 how they're proactively working
 992 00:39:05.180 --> 00:39:06.870 with socially vulnerable communities
 993 00:39:06.870 --> 00:39:09.220 ahead of disaster and to their mitigation
 994 00:39:09.220 --> 00:39:10.793 that hazard mitigation plans.
 995 00:39:12.020 --> 00:39:13.110 Some of the recommendations,
 996 00:39:13.110 --> 00:39:14.370 we end our research with that
 997 00:39:14.370 --> 00:39:16.800 there should be a state wide Disaster Relief
 Fund
 998 00:39:16.800 --> 00:39:19.200 for all regardless of immigration status.
 999 00:39:19.200 --> 00:39:21.500 It's inequitable that civil society,
 1000 00:39:21.500 --> 00:39:25.900 particularly migrant organizations
 1001 00:39:25.900 --> 00:39:28.169 that have little resources have to extend
 1002 00:39:28.169 --> 00:39:30.900 so much of their capital
 1003 00:39:30.900 --> 00:39:32.570 and fundraising efforts
 1004 00:39:32.570 --> 00:39:35.000 to safeguard these communities
 1005 00:39:35.000 --> 00:39:35.900 when this should be the role
 1006 00:39:35.900 --> 00:39:37.101 of the state government.
 1007 00:39:37.101 --> 00:39:39.360 There should also be emergency funding
 1008 00:39:39.360 --> 00:39:41.760 for CBOs on the ground working
 1009 00:39:41.760 --> 00:39:43.350 with these communities.
 1010 00:39:43.350 --> 00:39:46.733 Again, they have little resources,
 1011 00:39:47.580 --> 00:39:48.540 state and local governments
 1012 00:39:48.540 --> 00:39:50.270 need to develop new methods
 1013 00:39:50.270 --> 00:39:51.900 to map socially vulnerable communities

1014 00:39:51.900 --> 00:39:53.870 as I showed from the University of Washington
 1015 00:39:53.870 --> 00:39:55.610 on social vulnerability mapping,
 1016 00:39:55.610 --> 00:39:57.840 which is a great tool,
 1017 00:39:57.840 --> 00:40:00.090 but it still renders some communities invisible
 1018 00:40:00.090 --> 00:40:02.300 such as undocumented immigrants
 1019 00:40:02.300 --> 00:40:05.200 and into codified into law protections
 1020 00:40:05.200 --> 00:40:07.440 from wildfire smoke right now,
 1021 00:40:07.440 --> 00:40:09.570 advocates was able to work
 1022 00:40:09.570 --> 00:40:12.937 with the State Board of Occupational Health
 1023 00:40:12.937 --> 00:40:16.170 and Safety to do an emergency regulation
 1024 00:40:16.170 --> 00:40:17.590 for wildfire smoke.
 1025 00:40:17.590 --> 00:40:22.590 So when the air quality reaches 151 index,
 1026 00:40:23.030 --> 00:40:24.490 employers are required
 1027 00:40:24.490 --> 00:40:28.540 to provide a PPE N95 respirator masks
 1028 00:40:28.540 --> 00:40:29.680 but that's temporary
 1029 00:40:29.680 --> 00:40:32.130 and it's really been uneven up
 1030 00:40:32.130 --> 00:40:33.770 how this is enforced
 1031 00:40:33.770 --> 00:40:36.373 and this should be codified into law.
 1032 00:40:37.230 --> 00:40:40.520 So, I also had spoken to some individuals
 1033 00:40:40.520 --> 00:40:43.440 in Sonoma throughout the Central Coast
 1034 00:40:43.440 --> 00:40:47.850 that experienced fires on this past summer
 1035 00:40:47.850 --> 00:40:49.210 and they also account
 1036 00:40:49.210 --> 00:40:52.580 that there's an uneven N95 mass implementation
 1037 00:40:52.580 --> 00:40:54.090 throughout the state
 1038 00:40:54.090 --> 00:40:55.163 and in fact,
 1039 00:40:56.000 --> 00:40:58.560 the State Office of Occupational Health and Safety
 1040 00:40:58.560 --> 00:41:02.210 only has about a dozen Spanish speaking,
 1041 00:41:02.210 --> 00:41:04.020 individuals that go out in the field
 1042 00:41:04.020 --> 00:41:06.350 to do investigations on complaints

1043 00:41:06.350 --> 00:41:08.080 and compliance with this.
1044 00:41:08.080 --> 00:41:08.913 As far as I know,
1045 00:41:08.913 --> 00:41:09.746 they don't have anyone
1046 00:41:09.746 --> 00:41:11.100 that speaks indigenous languages,
1047 00:41:11.100 --> 00:41:12.620 so there's only about 12
1048 00:41:12.620 --> 00:41:16.450 or so people in the entire state of California,
1049 00:41:16.450 --> 00:41:19.440 there's a state of 40 million people,
1050 00:41:19.440 --> 00:41:21.200 only about 12 of them speak Spanish
1051 00:41:21.200 --> 00:41:22.110 that work in the field.
1052 00:41:22.110 --> 00:41:25.000 So there's a course on even implementation
1053 00:41:25.000 --> 00:41:27.390 of the role on the air quality index
1054 00:41:27.390 --> 00:41:29.503 that I mentioned about the wildfire smoke,
1055 00:41:31.209 --> 00:41:34.520 there's uncertainty about how this is being
achieved.
1056 00:41:34.520 --> 00:41:37.510 Oftentimes, these air quality monitoring sta-
tions,
1057 00:41:37.510 --> 00:41:39.440 our government monitoring stations
1058 00:41:39.440 --> 00:41:41.100 are often miles away
1059 00:41:41.100 --> 00:41:43.210 from the actual farm worker site.
1060 00:41:43.210 --> 00:41:46.330 So you may have a 151 index
1061 00:41:46.330 --> 00:41:49.360 about five miles away at air quality station
1062 00:41:49.360 --> 00:41:51.890 but that index could be much higher
1063 00:41:51.890 --> 00:41:53.060 at the field next,
1064 00:41:53.060 --> 00:41:55.670 that's happening near closer to the fire.
1065 00:41:55.670 --> 00:41:57.480 So there needs to be opportunities
1066 00:41:57.480 --> 00:42:00.360 to have real time handheld
1067 00:42:00.360 --> 00:42:02.670 GPS type of air quality monitoring
1068 00:42:02.670 --> 00:42:04.190 that these individuals
1069 00:42:04.190 --> 00:42:06.610 and employers should be using
1070 00:42:06.610 --> 00:42:08.900 instead of having for a wait up there
1071 00:42:08.900 --> 00:42:10.600 monitoring stations.

1072 00:42:10.600 --> 00:42:12.760 There's no state guidance on implementation
 1073 00:42:12.760 --> 00:42:14.660 of worker health and safety
 1074 00:42:14.660 --> 00:42:16.510 there's little guidance on that
 1075 00:42:16.510 --> 00:42:19.270 and one issue that's happening now,
 1076 00:42:19.270 --> 00:42:20.620 particularly in Sonoma
 1077 00:42:20.620 --> 00:42:23.000 is these access verification permits
 1078 00:42:23.000 --> 00:42:24.310 that allows farm workers
 1079 00:42:24.310 --> 00:42:28.180 to enter into mandatory evacuation zones
 over 400,
 1080 00:42:28.180 --> 00:42:30.170 I believe was issued
 1081 00:42:30.170 --> 00:42:33.690 by the Sonoma County Agricultural Com-
 missioner
 1082 00:42:34.750 --> 00:42:36.780 and this essentially allows foreign workers
 1083 00:42:36.780 --> 00:42:39.260 to enter these mandatory evacuation zones
 1084 00:42:39.260 --> 00:42:41.610 when everyone else is required to leave
 1085 00:42:41.610 --> 00:42:43.520 and these supervisors,
 1086 00:42:43.520 --> 00:42:45.290 the employers themselves
 1087 00:42:45.290 --> 00:42:47.180 do not have any emergency plans.
 1088 00:42:47.180 --> 00:42:50.960 So if the fire gets close to the farm worker
 site
 1089 00:42:50.960 --> 00:42:54.760 or more toxic smoke overtakes the entire
 farm,
 1090 00:42:54.760 --> 00:42:58.330 how are they gonna evacuate the farm work-
 ers
 1091 00:42:58.330 --> 00:43:01.540 in a swift and safe fashion?
 1092 00:43:01.540 --> 00:43:02.373 And moreover,
 1093 00:43:02.373 --> 00:43:04.230 there's no health test for these workers.
 1094 00:43:04.230 --> 00:43:05.690 So we don't know,
 1095 00:43:05.690 --> 00:43:08.244 what is the risk of working
 1096 00:43:08.244 --> 00:43:12.670 in this wildfire smoke itself
 1097 00:43:12.670 --> 00:43:16.030 as you know, is hazardous to human health
 1098 00:43:16.030 --> 00:43:18.070 but it's not only just the smoke itself

1099 00:43:18.070 --> 00:43:20.280 is the other types of toxins
1100 00:43:20.280 --> 00:43:21.970 that are missing from the burden buildings
1101 00:43:21.970 --> 00:43:24.230 that are in individuals.
1102 00:43:24.230 --> 00:43:27.530 So there's no follow up on workers testing
1103 00:43:27.530 --> 00:43:30.450 to find out calm how they're doing
1104 00:43:30.450 --> 00:43:33.980 after entering these mandatory evacuation
zones
1105 00:43:33.980 --> 00:43:36.580 and again, Cal/OSHA has limited staff,
1106 00:43:36.580 --> 00:43:38.180 as I mentioned before
1107 00:43:39.750 --> 00:43:44.580 and there I'll be able to open up to questions
1108 00:43:44.580 --> 00:43:46.230 and I look forward
1109 00:43:46.230 --> 00:43:48.450 to hearing your questions and comments.
1110 00:43:48.450 --> 00:43:50.090 This is just a quick slide
1111 00:43:50.090 --> 00:43:52.586 that we recently did in October
1112 00:43:52.586 --> 00:43:55.050 with the governor's office
1113 00:43:55.050 --> 00:43:56.240 and the United Nations.
1114 00:43:56.240 --> 00:43:59.980 So the United Nations Intergovernmental
Panel,
1115 00:43:59.980 --> 00:44:00.813 excuse me,
1116 00:44:00.813 --> 00:44:04.500 the United Nations International Organiza-
tion
1117 00:44:04.500 --> 00:44:09.350 on Migration hosted a panel with ourselves
1118 00:44:09.350 --> 00:44:12.230 as well as the California governor's office
1119 00:44:12.230 --> 00:44:14.540 on Emergency Services to talk
1120 00:44:14.540 --> 00:44:17.740 about what the rest of the world could learn
1121 00:44:17.740 --> 00:44:19.890 from the migrant experience in California
1122 00:44:19.890 --> 00:44:21.280 because these disasters
1123 00:44:21.280 --> 00:44:23.080 because of climate change is making the
severity
1124 00:44:23.080 --> 00:44:26.000 of these disasters more frequent and severe,
1125 00:44:26.000 --> 00:44:27.400 it's happening in Australia,
1126 00:44:27.400 --> 00:44:29.010 it's happening in Latin America,

1127 00:44:29.010 --> 00:44:30.720 it's happening in Greece

1128 00:44:30.720 --> 00:44:33.650 and migrant communities are all these places.

1129 00:44:33.650 --> 00:44:35.920 So the idea was to understand

1130 00:44:35.920 --> 00:44:37.420 what can the rest of the world learn

1131 00:44:37.420 --> 00:44:39.950 from the migrant wildfire disaster

1132 00:44:39.950 --> 00:44:42.180 experienced in California?

1133 00:44:42.180 --> 00:44:44.650 With that, I thank you for this opportunity

1134 00:44:44.650 --> 00:44:47.930 and look forward to speaking with you

1135 00:44:47.930 --> 00:44:49.273 about this research.

1136 00:44:51.220 --> 00:44:52.260 - Thank you, Michael,

1137 00:44:52.260 --> 00:44:54.650 so, wonderful presentation.

1138 00:44:54.650 --> 00:44:56.910 I know we do have a lot of questions coming

1139 00:44:56.910 --> 00:44:58.980 in the chat box.

1140 00:44:58.980 --> 00:45:03.980 So the first question is from Rebecca Hoffer,

1141 00:45:04.040 --> 00:45:05.220 she's asking,

1142 00:45:05.220 --> 00:45:08.530 are there any translation technologies available

1143 00:45:08.530 --> 00:45:12.280 to help overcome these niche language barriers

1144 00:45:12.280 --> 00:45:13.113 for migrants?

1145 00:45:14.508 --> 00:45:17.650 I had no idea many were not Spanish speaking

1146 00:45:17.650 --> 00:45:20.180 that is so crucial to them might be a quote,

1147 00:45:20.180 --> 00:45:22.520 tech or high education punishing

1148 00:45:22.520 --> 00:45:24.000 to do app that tech.

1149 00:45:24.000 --> 00:45:26.340 I know you mentioned about the Google translator

1150 00:45:26.340 --> 00:45:27.603 but any others?

1151 00:45:28.630 --> 00:45:32.220 Yeah, there's a couple that are there

1152 00:45:32.220 --> 00:45:34.400 but again, the owner should not be put

1153 00:45:34.400 --> 00:45:36.140 on the individual,

1154 00:45:36.140 --> 00:45:38.210 the individual resident worker

1155 00:45:38.210 --> 00:45:40.090 or community based organization,
 1156 00:45:40.090 --> 00:45:42.660 the owners needs to be on local
 1157 00:45:42.660 --> 00:45:44.610 and state government and federal government
 1158 00:45:44.610 --> 00:45:45.710 to provide the resources
 1159 00:45:45.710 --> 00:45:48.640 to safeguard all community residents,
 1160 00:45:48.640 --> 00:45:50.810 regardless of immigration status.
 1161 00:45:50.810 --> 00:45:54.250 So these individuals are important contribu-
 tors
 1162 00:45:54.250 --> 00:45:56.650 to our society, they make fresh fruits
 1163 00:45:56.650 --> 00:45:59.350 and vegetables available for us
 1164 00:45:59.350 --> 00:46:01.160 and do some of the important work
 1165 00:46:01.160 --> 00:46:02.830 as essential workers,
 1166 00:46:02.830 --> 00:46:06.380 but yet, we don't value them enough to
 safeguard.
 1167 00:46:06.380 --> 00:46:08.540 So that's why I had mentioned
 1168 00:46:08.540 --> 00:46:09.810 that systemic racism
 1169 00:46:09.810 --> 00:46:13.100 and cultural norms of around immigration
 1170 00:46:13.100 --> 00:46:15.700 determines who's the worthy disaster victim.
 1171 00:46:15.700 --> 00:46:18.440 So yes, that's great in terms of the interim,
 1172 00:46:18.440 --> 00:46:20.070 but local governments
 1173 00:46:20.070 --> 00:46:22.100 that have this type of workforce
 1174 00:46:22.100 --> 00:46:25.683 in their area needs to dedicate resources
 1175 00:46:25.683 --> 00:46:27.560 for live translation
 1176 00:46:27.560 --> 00:46:30.930 and have staffing a place like California,
 1177 00:46:30.930 --> 00:46:33.600 everyone think California is so progressive
 1178 00:46:33.600 --> 00:46:35.370 but here's a situation
 1179 00:46:35.370 --> 00:46:38.150 where a population, two populations
 1180 00:46:38.150 --> 00:46:39.050 are overlooked Spanish
 1181 00:46:39.050 --> 00:46:40.900 and indigenous speaking individuals
 1182 00:46:40.900 --> 00:46:43.183 are entirely rendered invisible.
 1183 00:46:44.790 --> 00:46:46.840 - Well, thanks, we also actually have a lot

1184 00:46:46.840 --> 00:46:50.580 of questions pre-collected from the students
1185 00:46:51.570 --> 00:46:54.800 and they are quite interested
1186 00:46:54.800 --> 00:46:57.940 in are there any quantitative evidence
1187 00:46:59.150 --> 00:47:00.340 showing the vulnerability
1188 00:47:00.340 --> 00:47:04.273 of these undocumented Latino from the re-
search?
1189 00:47:05.890 --> 00:47:06.723 - So right now,
1190 00:47:06.723 --> 00:47:10.040 there's social vulnerability mapping.
1191 00:47:10.040 --> 00:47:10.873 There's some great models
1192 00:47:10.873 --> 00:47:12.970 with the work the University of Washington
did,
1193 00:47:12.970 --> 00:47:14.294 it is great
1194 00:47:14.294 --> 00:47:17.400 but right now, there's, that I'm aware of,
1195 00:47:17.400 --> 00:47:18.280 there's no new models
1196 00:47:18.280 --> 00:47:21.700 that takes into account undocumented im-
migrants
1197 00:47:21.700 --> 00:47:23.750 and right now that that would take
1198 00:47:23.750 --> 00:47:28.750 a very well thought out a research designed
1199 00:47:29.290 --> 00:47:32.437 and human subjects protocol process
1200 00:47:34.720 --> 00:47:36.270 and working closely
1201 00:47:36.270 --> 00:47:37.750 to do what you call ground truth
1202 00:47:37.750 --> 00:47:39.330 and working with hand in hand
1203 00:47:39.330 --> 00:47:40.740 with these migrant organizations
1204 00:47:40.740 --> 00:47:42.300 to identify individuals
1205 00:47:42.300 --> 00:47:44.000 or where they may be in general
1206 00:47:44.000 --> 00:47:45.340 'Cause you don't obviously don't want it
1207 00:47:45.340 --> 00:47:47.159 to be too specific because of ice
1208 00:47:47.159 --> 00:47:49.670 and Immigration Services
1209 00:47:49.670 --> 00:47:51.400 but enough where it is,
1210 00:47:51.400 --> 00:47:55.400 you can identify it broadly in a region
1211 00:47:55.400 --> 00:47:56.460 because right now,
1212 00:47:56.460 --> 00:47:58.290 as you saw in Ventura, Santa Barbara

1213 00:47:58.290 --> 00:48:00.330 and other places in California too
1214 00:48:00.330 --> 00:48:02.500 and I'm guessing in the United States
1215 00:48:02.500 --> 00:48:06.500 as well as the current indices,
1216 00:48:06.500 --> 00:48:10.363 basically whitewash these communities.
1217 00:48:11.330 --> 00:48:12.670 - Okay, I think so.
1218 00:48:12.670 --> 00:48:17.390 Another question from the audience is from Joseph
1219 00:48:18.911 --> 00:48:22.130 and I guess he's asking,
1220 00:48:22.130 --> 00:48:24.770 has research investigated the possibility
1221 00:48:24.770 --> 00:48:28.470 of training community health advocates
1222 00:48:28.470 --> 00:48:30.910 within the indigenous communities
1223 00:48:30.910 --> 00:48:33.270 so as to improve utilization
1224 00:48:33.270 --> 00:48:34.960 and access to social services,
1225 00:48:34.960 --> 00:48:39.070 health care, and disaster relief information?
1226 00:48:39.070 --> 00:48:41.330 - Yeah, so that's I mentioned a very briefly
1227 00:48:41.330 --> 00:48:43.591 about the COVID-19 pandemic,
1228 00:48:43.591 --> 00:48:47.020 it's been three years since Thomas wildfire
1229 00:48:47.020 --> 00:48:48.713 and about three years three and a half years,
1230 00:48:48.713 --> 00:48:52.890 since the first major recent fire
1231 00:48:52.890 --> 00:48:55.100 in Northern California
1232 00:48:55.100 --> 00:48:56.486 and those far more regions
1233 00:48:56.486 --> 00:49:01.230 and these advocates have become disaster experts
1234 00:49:01.230 --> 00:49:03.810 in their own, not by choice,
1235 00:49:03.810 --> 00:49:05.150 they were forced to become this
1236 00:49:05.150 --> 00:49:06.530 because this is the constituency
1237 00:49:06.530 --> 00:49:09.030 that they advocate and protect
1238 00:49:09.030 --> 00:49:10.670 and you see migrant rights
1239 00:49:10.670 --> 00:49:12.570 whose immigration rights group are working
1240 00:49:12.570 --> 00:49:14.190 on climate change now working
1241 00:49:14.190 --> 00:49:19.020 because there's a strong sort of the cyclical process.

1242 00:49:19.020 --> 00:49:19.990 A lot of these individuals
1243 00:49:19.990 --> 00:49:21.340 are leaving their countries
1244 00:49:22.700 --> 00:49:24.160 to some extent climate refugees
1245 00:49:24.160 --> 00:49:26.210 with a drought soil erosion
1246 00:49:26.210 --> 00:49:28.760 in their ancestral homeland,
1247 00:49:28.760 --> 00:49:31.980 particularly for people (indistinct)
1248 00:49:31.980 --> 00:49:34.110 that come to United States
1249 00:49:34.110 --> 00:49:35.470 and then they come over here
1250 00:49:35.470 --> 00:49:36.850 and it's a different types
1251 00:49:36.850 --> 00:49:38.360 of climate change impacts
1252 00:49:38.360 --> 00:49:41.300 that are happening to them.
1253 00:49:41.300 --> 00:49:43.720 So you see these groups be more active
1254 00:49:43.720 --> 00:49:45.720 in non-traditional immigration
1255 00:49:46.680 --> 00:49:48.710 priority topics such as the environment
1256 00:49:48.710 --> 00:49:50.060 and now disaster.
1257 00:49:50.060 --> 00:49:51.480 So these individuals are part
1258 00:49:51.480 --> 00:49:53.630 of what's Vlad, what's enough,
1259 00:49:53.630 --> 00:49:57.060 volunteers organized for assistance and disaster
1260 00:49:57.060 --> 00:49:57.893 or something
1261 00:49:57.893 --> 00:50:02.893 and so the several other roundtables around disaster
1262 00:50:03.330 --> 00:50:05.640 and particularly the Red Cross
1263 00:50:05.640 --> 00:50:07.220 and Salvation Army,
1264 00:50:07.220 --> 00:50:10.150 they also have their own private,
1265 00:50:10.150 --> 00:50:12.050 mainstream disaster relief systems.
1266 00:50:12.050 --> 00:50:14.230 So these individuals are now brought in
1267 00:50:14.230 --> 00:50:16.140 to those discussions
1268 00:50:16.140 --> 00:50:19.650 that these disaster relief organizations have,
1269 00:50:19.650 --> 00:50:21.500 as well as state and local government
1270 00:50:24.180 --> 00:50:26.220 - There is a question from the students,

1271 00:50:26.220 --> 00:50:30.222 I'm glad you mentioned that COVID-19 situation

1272 00:50:30.222 --> 00:50:31.550 and listeners are wondering,

1273 00:50:31.550 --> 00:50:34.740 that does the COVID-19 disaster relief assistance

1274 00:50:34.740 --> 00:50:37.660 for immigrants help make the case

1275 00:50:37.660 --> 00:50:40.260 that the states really need to put funding

1276 00:50:40.260 --> 00:50:42.010 for health care coverage

1277 00:50:42.010 --> 00:50:45.090 for this and also rights, workers?

1278 00:50:45.090 --> 00:50:46.410 - Yeah, so two things happen

1279 00:50:46.410 --> 00:50:48.055 in California first important

1280 00:50:48.055 --> 00:50:48.888 to know about COVID-19,

1281 00:50:48.888 --> 00:50:51.736 about language information that happens

1282 00:50:51.736 --> 00:50:54.330 and the language we stick on.

1283 00:50:54.330 --> 00:50:56.070 There's no word for virus,

1284 00:50:56.070 --> 00:50:58.310 so they had to come up

1285 00:50:58.310 --> 00:51:00.500 with different types of both oral

1286 00:51:00.500 --> 00:51:03.100 and pictorial on messaging

1287 00:51:03.100 --> 00:51:05.620 that talked about it and not COVID-19

1288 00:51:05.620 --> 00:51:07.740 but an unknown illness

1289 00:51:07.740 --> 00:51:09.700 and disease in that region,

1290 00:51:09.700 --> 00:51:10.830 to be able to convey that.

1291 00:51:10.830 --> 00:51:13.880 So that's one thing is having culturally sensitive

1292 00:51:13.880 --> 00:51:16.940 and culturally appropriate messaging

1293 00:51:16.940 --> 00:51:19.290 on Emergency Information is important

1294 00:51:19.290 --> 00:51:22.330 and they have built up somewhat of a capacity

1295 00:51:22.330 --> 00:51:23.760 to be able to do that now

1296 00:51:23.760 --> 00:51:26.320 and work in partnership with the state government

1297 00:51:26.320 --> 00:51:28.370 and because of the advocacy these groups have done,

1298 00:51:28.370 --> 00:51:31.130 as well as the importance
 1299 00:51:31.130 --> 00:51:33.900 of the California Latino Legislative Caucus,
 1300 00:51:33.900 --> 00:51:35.720 so that the Latino Legislative Caucus,
 1301 00:51:35.720 --> 00:51:38.810 it is a caucus of Latinos,
 1302 00:51:38.810 --> 00:51:40.800 a lot of next legislators
 1303 00:51:40.800 --> 00:51:43.300 that work in the California State Legislature
 1304 00:51:43.300 --> 00:51:44.620 and there are a big number now
 1305 00:51:44.620 --> 00:51:46.440 and they have put a lot of pressure
 1306 00:51:46.440 --> 00:51:48.600 along with advocates on the governor
 1307 00:51:48.600 --> 00:51:53.290 to be more responsive to migrant communi-
 ties,
 1308 00:51:53.290 --> 00:51:55.260 particularly undocumented migrant commu-
 nities
 1309 00:51:55.260 --> 00:51:57.090 and this summer,
 1310 00:51:57.090 --> 00:51:59.950 the governor put \$50 million
 1311 00:51:59.950 --> 00:52:03.570 in a temporary Disaster Relief Fund
 1312 00:52:03.570 --> 00:52:05.011 and I believe
 1313 00:52:05.011 --> 00:52:08.080 the philanthropic community did another 25,
 1314 00:52:08.080 --> 00:52:10.410 so a total of 75 million that went
 1315 00:52:10.410 --> 00:52:13.340 for one type tax evasion to households,
 1316 00:52:13.340 --> 00:52:15.250 undocumented immigrant households,
 1317 00:52:15.250 --> 00:52:18.540 anywhere between 400 and \$700, I believe
 1318 00:52:18.540 --> 00:52:19.810 but that money's already gone
 1319 00:52:19.810 --> 00:52:21.160 and \$75 million sounds like a lot
 1320 00:52:21.160 --> 00:52:23.970 but that has been exhausted
 1321 00:52:23.970 --> 00:52:26.053 and it will go one time cash visa.
 1322 00:52:28.320 --> 00:52:30.707 - Thanks for the insights.
 1323 00:52:30.707 --> 00:52:31.930 From the audience
 1324 00:52:31.930 --> 00:52:34.190 there's also some question
 1325 00:52:34.190 --> 00:52:35.950 regarding the the other types
 1326 00:52:35.950 --> 00:52:37.620 of (indistinct) they meet

1327 00:52:38.690 --> 00:52:41.033 because sending the these communities,
1328 00:52:41.970 --> 00:52:45.000 from Leon Wesley, from Virginia is asking
1329 00:52:45.000 --> 00:52:47.270 is there any data info regarding the safety
1330 00:52:47.270 --> 00:52:48.940 of drinking water supplies
1331 00:52:48.940 --> 00:52:50.080 for their factory workers
1332 00:52:50.080 --> 00:52:53.450 and their living areas from this post fire
1333 00:52:53.450 --> 00:52:54.663 your mom took us in?
1334 00:52:55.520 --> 00:53:00.110 - Yeah, I'm a little bit aware of that,
1335 00:53:01.070 --> 00:53:04.000 so the toxins, as I mentioned,
1336 00:53:04.000 --> 00:53:05.430 mixing in the air,
1337 00:53:05.430 --> 00:53:09.410 it's just not regular trees burning down
1338 00:53:09.410 --> 00:53:10.980 but it's also all the materials
1339 00:53:10.980 --> 00:53:13.320 that build our houses and our infrastructure
1340 00:53:13.320 --> 00:53:14.830 that are quite toxic.
1341 00:53:14.830 --> 00:53:17.420 So that not only goes into the air
1342 00:53:17.420 --> 00:53:19.100 but that also goes into the water
1343 00:53:19.100 --> 00:53:21.770 in terms of what they call the fire debris
1344 00:53:22.830 --> 00:53:26.080 and the State Water Resources Control Board
1345 00:53:26.080 --> 00:53:27.820 is currently looking at that
1346 00:53:27.820 --> 00:53:31.240 in terms of maximum contaminant levels
1347 00:53:31.240 --> 00:53:34.980 and sort of what regions
1348 00:53:34.980 --> 00:53:37.050 and how these regions are being exposed
1349 00:53:37.050 --> 00:53:38.470 to this fire debris
1350 00:53:38.470 --> 00:53:41.190 in their community drinking water systems.
1351 00:53:41.190 --> 00:53:42.090 So that's something
1352 00:53:42.090 --> 00:53:44.060 that's currently being looked at.
1353 00:53:44.060 --> 00:53:46.479 Yes, but I don't know
1354 00:53:46.479 --> 00:53:50.453 how strong it's being regulated.
1355 00:53:51.820 --> 00:53:52.653 - Thank you.
1356 00:53:52.653 --> 00:53:54.560 So another question
1357 00:53:54.560 --> 00:53:56.824 from the audience is kind of related

1358 00:53:56.824 --> 00:53:58.180 to our earlier discussion

1359 00:53:58.180 --> 00:54:03.180 regarding the tours for these committees,

1360 00:54:03.600 --> 00:54:04.810 there is,

1361 00:54:04.810 --> 00:54:08.529 Marcus from Andrea is asking your experience

1362 00:54:08.529 --> 00:54:12.320 is having a digital healthcare a PP

1363 00:54:12.320 --> 00:54:15.010 for these communities by lingo

1364 00:54:15.010 --> 00:54:16.700 would that be helpful

1365 00:54:16.700 --> 00:54:18.850 to have accessible primary care

1366 00:54:18.850 --> 00:54:21.930 because these committees can have access

1367 00:54:21.930 --> 00:54:26.150 to mobile technologies are the prepare handling,

1368 00:54:26.150 --> 00:54:28.580 have these Wi-Fi

1369 00:54:28.580 --> 00:54:31.803 and mobile technologies available?

1370 00:54:33.244 --> 00:54:35.500 - I'm not sure entirely I understand that

1371 00:54:35.500 --> 00:54:37.265 but the MICOP,

1372 00:54:37.265 --> 00:54:40.760 the Mixtecal Indiana community organizing project

1373 00:54:40.760 --> 00:54:44.480 they did have a very high social media presence

1374 00:54:44.480 --> 00:54:46.330 and particularly WhatsApp

1375 00:54:46.330 --> 00:54:48.100 as from what I learned

1376 00:54:48.100 --> 00:54:49.510 from the recent and what I've been told,

1377 00:54:49.510 --> 00:54:54.260 is very popular in migrant communities,

1378 00:54:54.260 --> 00:54:56.080 particularly Mexican migrant communities.

1379 00:54:56.080 --> 00:54:59.030 So they decimate information

1380 00:54:59.030 --> 00:55:02.343 through WhatsApp, through their Instagram,

1381 00:55:02.343 --> 00:55:03.970 their Facebook

1382 00:55:03.970 --> 00:55:05.530 and I think they have another social media

1383 00:55:05.530 --> 00:55:06.670 and then of course, the radio,

1384 00:55:06.670 --> 00:55:09.840 the radio is a very simple one

1385 00:55:09.840 --> 00:55:11.710 that individuals get a lot
1386 00:55:11.710 --> 00:55:13.530 of their information from.
1387 00:55:13.530 --> 00:55:14.363 - Thank you.
1388 00:55:14.363 --> 00:55:15.196 I think given the time,
1389 00:55:15.196 --> 00:55:17.350 we'll have the final last question,
1390 00:55:17.350 --> 00:55:19.880 do we stop living later?
1391 00:55:19.880 --> 00:55:20.713 The question combining
1392 00:55:20.713 --> 00:55:22.500 from both the students asking
1393 00:55:22.500 --> 00:55:25.200 and one of the audiences kinda asking
1394 00:55:25.200 --> 00:55:28.580 about you have shown very powerful images,
1395 00:55:28.580 --> 00:55:30.900 both in the paper and the presentation
1396 00:55:30.900 --> 00:55:33.490 and telling the story
1397 00:55:33.490 --> 00:55:35.250 of these workers were required
1398 00:55:35.250 --> 00:55:37.790 to stay behind all gathering belong
1399 00:55:37.790 --> 00:55:39.740 from the employers home
1400 00:55:39.740 --> 00:55:42.890 despite this evacuation points.
1401 00:55:42.890 --> 00:55:45.770 So some, like insights
1402 00:55:45.770 --> 00:55:47.560 regarding how to help
1403 00:55:47.560 --> 00:55:51.990 make these local employers accountable
1404 00:55:51.990 --> 00:55:53.610 for putting workers
1405 00:55:53.610 --> 00:55:55.230 in these dangerous situations.
1406 00:55:55.230 --> 00:55:56.063 - Sure.
1407 00:55:56.990 --> 00:56:01.990 I didn't get a chance to download this audio
file
1408 00:56:03.250 --> 00:56:05.600 because of the mix up in time
1409 00:56:05.600 --> 00:56:08.670 but I want to talk first play this audio file
1410 00:56:08.670 --> 00:56:11.800 real quick of what the Mixtec language
sounds like.
1411 00:56:11.800 --> 00:56:12.693 I'm sure there's many people
1412 00:56:12.693 --> 00:56:14.739 that have never heard it before.
1413 00:56:14.739 --> 00:56:18.406 (speaking foreign language)

1414 00:56:32.155 --> 00:56:34.750 So as you can hear it,
1415 00:56:34.750 --> 00:56:37.770 the language resembles nothing like Spanish.
1416 00:56:37.770 --> 00:56:40.990 So that's a major issue on the daily
1417 00:56:40.990 --> 00:56:43.070 with how to create connections
1418 00:56:43.070 --> 00:56:44.830 and trust within these communities
1419 00:56:44.830 --> 00:56:48.900 and deliver culturally appropriate language
1420 00:56:49.882 --> 00:56:51.610 and the Emergency Information
1421 00:56:51.610 --> 00:56:54.390 and I forgot what was the question again?
1422 00:56:54.390 --> 00:56:55.600 - So the question is like,
1423 00:56:55.600 --> 00:57:00.600 how the local organizations can help
1424 00:57:02.618 --> 00:57:06.890 to hold the employers accountable
1425 00:57:06.890 --> 00:57:08.000 for putting these workers
1426 00:57:08.000 --> 00:57:09.690 in this dangerous places?
1427 00:57:09.690 --> 00:57:13.079 - I think it's contingent advocacy
1428 00:57:13.079 --> 00:57:14.990 and then the passage
1429 00:57:14.990 --> 00:57:16.900 of some of these occupational health
1430 00:57:16.900 --> 00:57:17.943 and safety rules,
1431 00:57:19.206 --> 00:57:21.440 there obviously needs to be more done on
1432 00:57:21.440 --> 00:57:22.410 as I mentioned before
1433 00:57:22.410 --> 00:57:24.830 these access verification permits
1434 00:57:24.830 --> 00:57:26.990 and it's sort of a black box
1435 00:57:26.990 --> 00:57:30.300 about how the county agricultural Commis-
sioner
1436 00:57:30.300 --> 00:57:32.900 is issuing these permits to employers.
1437 00:57:32.900 --> 00:57:36.580 So does any employer that request one gets
one,
1438 00:57:36.580 --> 00:57:41.200 are they looking at land fire risk zones
1439 00:57:41.200 --> 00:57:42.880 and how close the proximity the fire
1440 00:57:42.880 --> 00:57:44.290 is to the farm itself
1441 00:57:44.290 --> 00:57:45.840 and again, the air quality issues
1442 00:57:45.840 --> 00:57:47.500 and making sure that PP

1443 00:57:47.500 --> 00:57:52.160 is being distributed properly and effectively
1444 00:57:52.160 --> 00:57:54.340 because we saw instances
1445 00:57:54.340 --> 00:57:57.610 in our own research that even at the time,
1446 00:57:57.610 --> 00:57:58.630 this was three years ago,
1447 00:57:58.630 --> 00:57:59.463 even at the time
1448 00:57:59.463 --> 00:58:03.360 when people were donating these N95 masks
1449 00:58:03.360 --> 00:58:05.180 some employers wouldn't give them out
1450 00:58:05.180 --> 00:58:06.520 and there was other instances
1451 00:58:06.520 --> 00:58:09.160 where my co-authors saw
1452 00:58:09.160 --> 00:58:11.460 that they were giving it out only to men
1453 00:58:11.460 --> 00:58:12.630 and not women.
1454 00:58:12.630 --> 00:58:16.670 So there's a very uneven implementation
1455 00:58:16.670 --> 00:58:18.730 of some of even the existing health
1456 00:58:18.730 --> 00:58:19.720 and safety rules.
1457 00:58:19.720 --> 00:58:21.090 So more needs to be done
1458 00:58:21.090 --> 00:58:23.550 and there needs to be more transparency
1459 00:58:23.550 --> 00:58:24.700 and accountability
1460 00:58:24.700 --> 00:58:27.560 and as we have these workers working
1461 00:58:27.560 --> 00:58:29.103 in these dangerous zones.
1462 00:58:31.200 --> 00:58:32.460 - Thank you so much Michael
1463 00:58:32.460 --> 00:58:35.830 for sharing all this kind of justice experience
1464 00:58:35.830 --> 00:58:37.680 and thank you all the audience
1465 00:58:37.680 --> 00:58:38.910 for joining us today
1466 00:58:38.910 --> 00:58:43.290 and I think we'll end now, so bye everyone.
1467 00:58:43.290 --> 00:58:45.830 Thank you, Michael. - Thank you, bye-bye.
